Teacher Manual: Digital Art Imaging 1

Florida Course 0108370 · High School (Grades 9–12) · Full Year · Asynchronous, On-Demand, with a live facilitator

How to use this manual. This is a standalone facilitator reference. It is not part of the student-facing course and should never be shared with students or posted in Canvas where students can see it. It documents the course exactly as built in 04_Final (Semester 1: Modules 1–2; Semester 2: Modules 3–4), read directly from the built lesson pages, Canvas-item specs, and module maps.

Software: Pixlr E (free, browser-based, pixlr.com/e) is the only tool used all year. No paid software is required anywhere in this course.

Portfolio convention: every student keeps a OneDrive folder named DigitalArt_Portfolio_LastName; files are named DAI_W##_<Item>_LastName.

Where facts in this manual came from: every module's lesson.html (3 read in full as exemplars; the remaining 29 grepped for AI/VR/callout locations), every canvas-items.md (33 of 33, read in full), all four _module-N-map-and-wrappers.md files, both semesters' _BUILD-CONVENTIONS.md, and the course's own syllabus. Anything not directly confirmed by one of those files is marked **[VERIFY]**.

TABLE OF CONTENTS

1. How This Course Works — typical lesson, typical week, major assessments

14. Sensitive-Content Flags & Family/Student Scripts

1 How This Course Works

1.1 A typical lesson

Every content week's `Lesson.html` follows one locked anatomy (confirmed byte-for-byte across all 32 built weeks; exemplar read: Module 1 Week 1, Module 2 Week 1, Module 3 Week 1):

1. **Metadata strip** — Quarter/Week, Focus, This Week's Project, Software (always Pixlr E).
2. **Lavender title strip** — Module/Week number and focus.
3. **Essential Question card** (gold top border) — the module's driving question, framed for that week.
4. **Part 1 • Look First** — a prominent inline CSS/SVG visual (never a stock photo) illustrating the week's core concept, followed by an ow-reflect check-in widget (no wrong answer; the student picks an option and gets a tailored response).
5. **Part 2 / Part 3 teaching cards** — real content, worked examples, public-domain image embeds with sourced captions, and one ow-select evaluative widget placed after the teaching it tests (right/wrong with feedback, unlimited retries, reset button).
6. **Callouts as earned** — c-help (tip/workflow), c-art (studio/craft or history note), c-warn (the week's AI-awareness note; see Section 3).
7. **Vocabulary grid** — the week's key terms.
8. **"What You'll Do Next (In Canvas)"** — a numbered list of the week's Canvas items; teal-numbered items are Tier 1/2, the single coral-numbered item is the week's Tier 3 graded project.
9. **The Big Idea** — a short wrap-up paragraph.

WHAT TO TELL A NEW FACILITATOR

The lesson page itself is never gradable. Nothing on it is submitted or scored; its widgets give the student instant feedback and reset freely. The actual grade book only has four kinds of touchpoints per week, all built as native Canvas items and linked from the bottom of the lesson page: a quiz, a discussion, sometimes a short completion assignment/exercise, and one teacher-graded project.

1.2 A typical week

SEGMENT	WHAT THE STUDENT DOES	GRADED?	TIER
Lesson page	Reads the week's <code>Lesson.html</code> ; completes 1 reflective + 1 evaluative widget for immediate feedback.	No	Ungraded (Tier 4-equivalent)
Warm-up assignment/exercise	A short completion-scored practice task (present most, not all, weeks — see Section 7 catalog).	Yes, completion	Tier 1
Quiz	6–10 multiple-choice / true-false / matching questions, auto-scored, unlimited attempts (highest score kept).	Yes, auto	Tier 1
Discussion	A specific-prompt post + 1 reply (most weeks; see Section 7 for the 5 weeks without one).	Yes, rubric (3-level)	Tier 2
Project	One teacher-graded piece of artwork/photography built in Pixlr E, plus a short reflection on most weeks.	Yes, 4-criteria rubric	Tier 3 (one per week, max)

Minutes/week: the course's own Module 0 "Plan Your Time" item states "about 250 minutes per week" (the standard HS figure) and asks the facilitator to confirm this against the Study Planner manifest. [\[VERIFY\]](#)

No dedicated weekly VR activity is built into any of the 32 content weeks — see Section 3 for the full finding.

1.3 Major assessments (every Tier 3 item, all four modules)

28 distinct teacher-graded grading events run across the year (some projects span two weeks and are graded once, at final submission, against the rubric introduced in the first week — noted below).

MOD/WK	ITEM	PTS	WHAT IT ASKS	GRADING TIME NOTE
MODULE 1 • Q1 • Digital Imaging Foundations & Photography				
W1	Creating Digital Art: "This Is Me as a Digital Artist"	40	Cover image: background, 3+ shapes, signed/dated, one personal symbol	Standard 4-criteria rubric, ~5 min/student
W2	Art Lesson & Reflection (Elements & Principles)	40	4+ Elements, 2+ Principles, focal point, written reflection	Standard rubric
W3	Creating Digital Color	40	One consistent color scheme, 5+ shapes, RGB/HSL used deliberately	Standard rubric
W4	Two Are Better Than One	40	2+ shapes combined into one new recognizable object via layers	Standard rubric
W5	Lines and Space in a Photograph	40	Original photo: leading line, positive/negative space, rule of thirds + reflection	Standard rubric
W6	An Intentional Photograph	40	2 photos (inclusion/exclusion) + reflection	Standard rubric, 2 photos to review
W7	Making the Ordinary Extraordinary	40	Photo of an ordinary object using line, space, technique, composition + reflection	Standard rubric
W8	Module 1 Assessment: "My Strongest Work" (capstone)	50	2–3 best photos from Wks 5–7 + reflection	Standard rubric; heavier week (multi-photo read)
MODULE 2 • Q2 • Capturing Light & Editing				
W1	Mini Lessons & Reflection (texture/movement)	40	2 original photos + reflection	Standard rubric
W2	Art Lesson & Reflection (perspective)	40	2 photos, 2 perspectives + reflection	Standard rubric
W3	Art Lesson & Reflection (natural/artificial light)	40	2 photos + reflection	Standard rubric
W4	Art Lesson & Reflection (emphasis + non-digital editing)	40	1 photo combining an emphasis method and a DIY tool + reflection	Standard rubric
W5	Mini Lesson (Editing & Exposure)	40	Original + edited photo pair, exposure-corrected in Pixlr E	Standard rubric, 2 files
W6	Mini Lesson (Color Editing & Filters)	40	1 edited photo, color adjustment + blur/filter + short reflection	Standard rubric
W7	End-of-Semester Project: Edited Photo Series (capstone)	50	3 photos, 2+ lighting techniques, 1 texture photo, edits, 100–150-word artist statement	Standard rubric; heaviest single week in Module 2 (3 photos + statement)
W8	<i>No project — review week only</i> (comprehensive quiz + reflection discussion)	—	—	Light week
MODULE 3 • Q3 • Collage & Typography				
W1	First Digital Collage	40	3+ images/layers, 1 mask, 1 blend mode, clear subject	Standard rubric
W2	Art Lesson & Reflection (Balance)	40	Revised/new composition demonstrating 1 balance type + reflection	Standard rubric
W3–W4	Surrealism Collage (marquee project)	60	Impossible/dreamlike concept, mask, blend mode, balance type. Begun W3 (draft, not separately)	Standard rubric; graded once at W4

graded), revised on self- and peer-critique, final graded at end of W4.

W5	Type Hierarchy Exercise	40	Headline/subhead/body block, one typeface family, consistent spacing	Standard rubric
W6	Expressive Type Poster	40	Poster: display headline, supporting line, body block, 1 warp/rotation/blend + reflection	Standard rubric
W7	Text-in-Art Study	40	Own piece making a number/word the dominant compositional shape + statement	Standard rubric
W8	Typography Project: Poster or Advertisement (capstone)	50	Full poster/ad: hierarchy, font pairing, alignment, 1 expressive touch	Distinct capstone rubric — see Section 6; heaviest week in Module 3

MODULE 4 • Q4 • Drawing, Animation & Final Portfolio

W1	Proportion & Form Drawing	40	Sketch/line-art/shading layers; full value range	Standard rubric
W2–W3	Digital Mosaic	40	Tile-based image, chosen grid scale. Begun W2, final graded end of W3.	Standard rubric; graded once at W3
W4	3–5 Frame Animation	40	Frames built in Pixlr E, assembled into a GIF with a free browser tool	Standard rubric
W5–W6	Animation Project (loop)	40	4–8 frame storyboarded loop. Draft graded W5, finalized/revised on critique feedback, final grade applied W6.	Standard rubric; graded once at W6
W7	Final Project (capstone, student's choice of medium)	50	One polished piece + 150–250-word artist statement naming 2+ Elements/Principles used on purpose	Standard rubric; read the statement carefully for genuine, non-generic reasoning
W8	Final Portfolio (course capstone)	40	6–10 curated pieces across the whole year, one per page/slide, captioned, in Word or PowerPoint	Standard rubric; heaviest single grading event of the year — reading/opening a multi-page document per student

Point values above are read directly from each week's `canvas-items.md`. Quiz point totals are not stated in the build (question counts only, auto-scored); if your Canvas instance requires an explicit quiz point value, a small uniform value (e.g., 10 pts) is a reasonable default. **[VERIFY]**

2 Ungraded Interactives & the Intro/Outro Wrappers

2.1 Ungraded interactives (the lesson-page widgets)

Every lesson page carries exactly two interactive widgets, built from the same reusable engine (byte-consistent CSS/JS copied from the exemplar, confirmed across all 32 weeks):

- **ow-reflect** (in Part 1, Look First) — a no-wrong-answer check-in. The student picks one of several options and receives a tailored response. There is no "correct" choice; it is a warm-up for the concept.
- **ow-select** (in Part 2/3, after the teaching it tests) — a right/wrong practice item with immediate feedback and a hint on a miss. Students can retry indefinitely; every widget has a visible Reset button.

COST TO THE TEACHER: ZERO

These widgets produce no submission and appear nowhere in the gradebook. They are formation-by-practice, not busywork to chase down. A student who skips them shows up indirectly, in weaker quiz or project performance, never as a missing grade. Do not ask students to "prove" they did the widgets; there is nothing to prove.

2.2 Intro/outro wrappers

Each of the four content modules (not the Module 0 orientation, which has no wrapper of its own) opens and closes with a wrapper built as a **Canvas Quiz in survey mode**, never a wiki page. This is deliberate: survey-mode responses can be exported and sorted as cohort data, which a static page cannot do.

WRAPPER	CONTENTS
INTRO (start of module, ungraded/completion)	Essential question (first answer, short answer) · objectives acknowledgment (select-all) · group-work opt-in (independent or an approved group with a signed Group Covenant)
OUTRO (end of module)	Essential question revisited (what changed) · confidence rating (Likert 1–5) · "what's still unclear" (free response) · virtue reflection tied to that module's named virtues. Module 4's outro adds a fifth item: a year-end portfolio reflection (which piece the student is most proud of, and how their skill changed since Module 1).

THE HIGHEST-LEVERAGE MOVE IN THE COURSE

Spend 15–20 minutes per module triaging the outro responses before you do anything else that cycle. Sort or filter for low confidence-rating clusters and repeated "still unclear" answers. That is your earliest, cheapest signal of which students (and which concepts) need help, well before a missed quiz or project would tell you the same thing. Turn what you find into a targeted announcement, an Ignite-AI-drafted nudge (Section 4), or a short individual message. This is coaching, not grading — there is nothing to score here.

Module 4's outro doubles as a lead-in for grading the Final Portfolio in Week 8 — skim those year-end reflections before that grading session (this is the build's own teacher note).

3 AI & VR in This Course (Student-Facing)

3.1 AI: awareness, not required tool use

Every one of the 32 content lessons carries exactly one factual AI-awareness callout (the red-bordered c-warn box), always placed after the week's teaching and before the vocabulary grid. None of them requires or recommends a specific AI tool; each names what an AI tool *can* do for that week's task and what it cannot: it cannot make the specific compositional, physical, or reflective decision the week's project is graded on. Locations, by module/week:

MOD/WK	CALLOUT HEADING
MODULE 1	
W1	AI Image Tools
W2	AI and Composition
W3	AI Color Palettes
W4	AI Shape Generation
W5	AI and Composition
W6	Computational Photography
W7	AI Image Search
W8	AI and Self-Assessment
MODULE 2	
W1	AI Image Tools
W2	AI Image Tools
W3	AI Image Tools
W4	AI Image Tools
W5	AI Auto-Enhance and One-Click Filters
W6	AI One-Click Enhance Tools
W7	AI Image Generators vs. Your Own Photographs
W8	AI Image Tools
MODULE 3	
W1	AI Image Tools and Collage
W2	AI Layout Suggestions
W3	AI Image Generation and Surrealism
W4	AI Feedback Tools
W5	AI Font and Layout Suggestions
W6	AI Font-Pairing Tools
W7	AI and Text-in-Image Tools
W8	AI Layout and Font Generators
MODULE 4	
W1	AI Drawing Tools
W2	AI Mosaic Filters

W3	(studio/critique week; no new lesson callout — the Week 2 callout applies)
W4	AI Video and Animation Tools
W5	AI Video and Animation Tools
W6	(studio/critique week; the Week 5 callout applies)
W7	AI and Your Final Project
W8	Write Your Own Captions

A second, non-AI-specific callout reinforces the same posture in Module 1 Week 1: a "Being a Responsible Digital Artist" note (c-art) covering originality, sourcing, plagiarism, and signing/dating work. Nothing in the build asks a student to use, avoid, or be tested on a specific AI product; the posture is consistently *factual*, *not persuasive*, per the course's own convention.

3.2 VR: a genuine gap to flag before deployment

[VERIFY] — discrepancy between the build notes and the built course. The Semester 1 and Semester 2 _BUILD-CONVENTIONS.md files both state: "VR appears as a platform-agnostic, student-chosen-location solo activity where the week earns it (not every week)." Having read every canvas-items.md in the course (33 of 33) and grepped every lesson.html (32 of 32), **no week in Modules 1–4 actually contains a built VR assignment.** The only two VR touchpoints in the entire course are:

- Module 0's "Introduce Yourself" discussion, which offers a VR introduction as one of four optional response formats a student may choose (alongside a written post, an audio/video intro, or a creative piece); and
- A forward reference in Module 1 Week 1's lesson text ("Later this year you will make and share art inside a virtual space of your own," in the context of the teamLab example), which is never fulfilled by any later week.

The Module 0 Scavenger Hunt's own answer key also tells students VR activities are "linked from the relevant weekly modules in Canvas" — as built, this is not accurate for any of the 32 weeks. Before this course deploys, confirm with the build team whether platform-agnostic VR activities are still intended to be added to specific weeks, or whether these two references should be revised to match the course as actually built.

Until that is resolved, tell facilitators: describe VR to students only as it exists today (the optional Module 0 introduction format), and do not promise a weekly VR activity that is not there.

4 Using Ignite AI to Support Students (Teacher-Facing)

[VERIFY] before relying on this section. Ignite AI's exact feature names and availability vary by Canvas release and by what Optima has enabled on this instance. The capabilities below are described functionally; confirm the current feature set in Optima's Canvas before promising a specific button to a facilitator.

This section is entirely separate from Section 3. Section 3 is what students are told about AI; this section is a tool for *you*, the facilitator, to make a 500-ish-student caseload feel personal without adding hours.

Draft individualized feedback

Use Ignite AI to draft a first pass of feedback on a Tier 3 rubric score (e.g., "explain why this collage's masking scored a 3, not a 4"), then edit it into your own voice before sending. Faster turnaround on the week's one graded project, same human judgment behind every word that reaches a student.

Summarize discussions and wrapper analytics

Ask it to summarize a week's discussion thread or a module's outro-wrapper responses to surface the cohort's shared sticking points fast, before you triage them yourself (Section 2.2).

Surface students who need a nudge

Low outro confidence, a missed Tier 3 deadline, or a slipping quiz score are the signals. Ask Ignite AI to draft a warm, specific check-in message for that student; you read it, adjust the tone, and send it yourself.

Generate practice variants

A student who needs another rep on a Tier 1 skill (e.g., blend modes, exposure correction) can get a fresh practice prompt drafted by Ignite AI rather than the exact same quiz question repeated.

Communicate with families

Draft a clear, kind progress summary or translate a message for a family that needs it. You still send it, in your voice.

GOVERNING RULE: AI DRAFTS, THE TEACHER DECIDES

Every one of the uses above produces a draft, never a final message. You always read, edit, and own anything that reaches a student or family. Ignite AI is never used to surveil, rank, or auto-penalize a student; it exists to make the coach-not-catch stance in Section 8 practical at scale.

5 Grading Categories & Canvas Gradebook Setup

5.1 Two different ratios — do not confuse them

Grade-weight breakdown (points in the gradebook)

Confirmed verbatim from the Module 0 Scavenger Hunt's own answer key:

CATEGORY	WEIGHT
Projects & Portfolio	60%
Classwork / Practice / Reflections	30%
Quizzes / Critiques / Discussions	10%

Item-mix ratio (how many items per week, not points)

From `_BUILD-CONVENTIONS.md`, the target mix of graded item *types* built into each week:

TIER	TARGET SHARE
Tier 1 (auto-graded/completion)	~60%
Tier 2 (discussion)	~25%
Tier 3 (one teacher-graded project/week, max)	~15%

These measure different things. The first is what determines a student's final grade in Canvas; the second is how the course's builders decided how many quiz questions, discussions, and projects to write per week. A week can (and does) have 60% of its *items* be a quick auto-graded quiz while that same quiz contributes only a sliver of the 10% grade-weight category it sits in.

5.2 Mapping items to assignment groups

CANVAS ASSIGNMENT GROUP	WEIGHT	WHAT GOES IN IT
Projects & Portfolio	60%	The one Tier 3 teacher-graded project per week, all module/semester capstones, the Final Project, and the Final Portfolio.
Classwork, Practice & Reflections	30%	Tier 1 completion assignments and exercises (setup tasks, scavenger hunts, mini-lessons, self-critique checklists, planning scaffolds).
Quizzes, Critiques & Discussions	10%	Auto-graded quizzes and Tier 2 discussions (including peer-critique discussions).

[VERIFY] The build's own summary line names three categories but does not spell out, item by item, whether every Tier 1 completion assignment belongs in "Classwork/Practice/Reflections" versus whether some (e.g., quiz-style reading checks) should sit with "Quizzes." The mapping above is the most literal, defensible reading of the Scavenger Hunt's own answer key; confirm it against Optima's actual gradebook setup before publishing weights.

5.3 Step-by-step Canvas setup

1. Create three Assignment Groups: *Projects & Portfolio*, *Classwork, Practice & Reflections*, *Quizzes, Critiques & Discussions*.
2. Set group weights to 60% / 30% / 10% respectively, and turn on "Weight final grade based on assignment groups."
3. Set the grading scheme to whatever letter-grade scale Optima uses school-wide. **[VERIFY]** (not specified in this course's build files).
4. Mark every intro/outro wrapper as a Canvas Quiz in **Survey** mode (not Graded Survey), so it collects data without occupying a gradebook column.
5. Set Tier 1 completion items to **Complete/Incomplete** grading, not points, where the build calls them "completion."
6. Decide and apply a late/missing-work policy. **[VERIFY]** (not specified in the build; a reasonable default is to allow unlimited quiz retries as already built, and a short, defined late window on Tier 3 projects given their weekly cadence).

7. Turn on the **Module Requirements / progress** view so students and you can see one complete/incomplete signal per module at a glance, separate from the graded columns.

5.4 Gradebook map (every graded item, all four modules)

Every item below is read directly from that week's `canvas-items.md`. "Group" abbreviations: **P&P** = Projects & Portfolio (60%), **CPR** = Classwork/Practice/Reflections (30%), **QCD** = Quizzes/Critiques/Discussions (10%).

W6	Final Frame Export Check	Assignment	1	5	CPR	Completion
W6	Animation Peer Critique	Discussion	2	15	QCD	Rubric
W6	Animation Project (Final Submission)	Project	3	40	P&P	Finalizes W5 grade
W6	Silent Video + Sound Effect (optional)	Assignment	1	—	CPR	Completion, optional, no grade impact
W7	Final Project Planning Scaffold	Assignment	1	10	CPR	Completion
W7	Final Project Readiness	Quiz	1	n/s	QCD	Auto
W7	Final Project	Project (capstone)	3	50	P&P	4-criteria rubric
W8	Portfolio File Check	Assignment	1	10	CPR	Completion
W8	Portfolio Showcase	Discussion	2	10	QCD	Rubric
W8	Final Portfolio	Project (course capstone)	3	40	P&P	4-criteria rubric

"n/s" = not stated as a point value in the build (question count given instead); see 5.3 above for the recommended default.

6 Rubrics for Every Teacher-Graded Item

6.1 Standard module-assessment rubric (used for 26 of 28 Tier 3 grading events, all four modules)

Confirmed in Module 1 Week 1's `canvas-items.md` and held identical (only the descriptor wording shifts slightly per project) across the whole year. Paste this in as a native Canvas Rubric on every Tier 3 item so it scores directly in SpeedGrader.

CRITERION	4 – STRONG	3 – PROFICIENT	2 – DEVELOPING	1 – BEGINNING
Understanding of the tools	All required elements present, used correctly	Most elements present, minor gaps	Some elements present, inconsistent	Elements missing or misused
Quality of choices	Clearly intentional; every choice serves the concept	Mostly intentional	Some intention, underdeveloped	Random or default choices
Craftsmanship	Clean, finished, exported/saved correctly	Minor rough edges	Noticeably unfinished	Incomplete file
Intellectual honesty	Original, signed/dated, reflection or statement genuinely matches the work	Mostly original, minor gaps	Vague or generic reflection	Not clearly original, or statement does not match the piece

~5 minutes per student is a reasonable target once you know this rubric; it repeats all year, so grading speed should increase after Module 1.

6.2 Distinct capstone rubric — Module 3, Week 8: Typography Project

The build explicitly calls this rubric out as separate from the standard weekly rubric. Do not substitute the standard rubric here.

CRITERION	4 – STRONG	3 – PROFICIENT	2 – DEVELOPING	1 – BEGINNING
Hierarchy	Reading order clear within seconds; size/weight/color all deliberate	Clear with minor inconsistency	Some size difference, order unclear or a level missing	No distinction, or hierarchy reversed
Font pairing	2–3 fonts, clear purposeful contrast	Works, small mismatch	Fonts too similar or 3+ without a system	One font only, or fonts clash
Alignment	Consistent, intentional throughout	Mostly consistent, one slip	Varies without reason	No consistent alignment
Expressive type	Exactly one touch, well integrated, strengthens the message	Present, minor rough integration	Disrupts hierarchy or feels disconnected	Missing, or multiple competing touches

6.3 Discussion rubric (every Tier 2 discussion, all year)

LEVEL	DEFINITION
Substantive (full credit)	Specific example/detail named, the prompt's required parts all present, and a genuine reply given.
Thin (partial credit)	Vague or missing detail, or a missing/generic reply.
Missing (zero)	No post, or no reply.

A handful of discussions layer a named critique protocol on top of this same 3-level rubric: a **4-step** describe/analyze/interpret/judge protocol (Module 1 Week 8 Photography Critique; Module 4 Week 3 Mosaic Peer Critique) and a **3-part** what-works/what's-unclear/one-suggestion protocol (Module 3 Week 4 Collage Peer Critique; Module 4 Week 6 Animation Peer Critique). Score these the same way: substantive requires every named step to be present and specific, not just polite.

6.4 Free-response quiz answer guides

THIS COURSE HAS NONE — AND THAT IS BY DESIGN

Every quiz in this course (all 32 weekly quizzes plus the Module 1 Review, the Semester 1 Comprehensive Quiz, the Final Project Readiness quiz, and the two reading checks/matching exercises) uses multiple-choice, true/false, or matching items only. All of them are fully auto-graded in Canvas with an answer key already marked in the build (✓ or "correct"). There is no free-response/short-answer quiz item anywhere in the course requiring a teacher-scored answer guide. Section 7 is therefore about running discussions, critiques, and projects, not scoring open quiz responses.

7 Discussions, Quizzes & Interactive/Assessment Activities

This section explains each item *type* in general terms; Section 5.4 is the full per-instance list (module, item, points, group). Cross-reference rather than re-read both.

TYPE	WHAT IT IS / HOW IT'S SCORED	TEACHER MOVE
Auto-graded quiz (Tier 1)	6–12 MC/TF/matching questions, unlimited attempts, highest score kept, answer key built in.	Nothing to grade. Spot-check only if a question's analytics show most students missing it (possible wording issue).
Completion assignment/exercise (Tier 1)	A short warm-up task (scavenger hunt, sketch, checklist, planning sheet) scored complete/incomplete against 2–4 stated criteria.	Skim for the stated criteria only; do not rubric-score it.
Structured discussion (Tier 2)	A specific (never open-ended) prompt, post + 1 reply, scored Substantive/Thin/Missing (Section 6.3).	Read in batches at a set time each week; drop 2–3 public model comments naming strong examples, per the build's own repeated teacher notes.
Peer-critique discussion (Tier 2)	Same 3-level rubric, but the reply must follow a named 3- or 4-step critique protocol.	Model one full protocol-compliant critique publicly early in the week (the build's own recurring teacher note) so students see the standard before posting their own.
Reflection/wrapper survey (Tier 4, ungraded/completion)	Canvas Quiz in survey mode; see Section 2.2.	Triage, don't grade (15–20 min/module).
Standard project (Tier 3)	One teacher-graded artwork/photo/document per week, max, scored on the 4-criteria rubric (Section 6.1).	~5 min/student once the rubric is familiar.
Marquee/multi-week project (Tier 3)	Surrealism Collage (M3 W3–4), Digital Mosaic (M4 W2–3), Animation Project (M4 W5–6). Begun and drafted in week one, graded once at final submission in week two, against the same rubric introduced in week one.	Do not grade the mid-project draft upload; it is a checkpoint, not a submission.
Capstone project (Tier 3)	Module 1 Week 8, Module 2 Week 7, Module 3 Week 8 (distinct rubric, Section 6.2), Module 4 Weeks 7 and 8.	Budget extra time; these read longer (multi-photo sets, artist statements, multi-page portfolios).
Embedded lesson widget (ungraded)	ow-reflect and ow-select; see Section 2.1.	No teacher action.

8 Coach, Not Catch

Your job is to move each student forward, not to detect and punish. In this course, concretely:

- **Lead with what's working.** The 4-criteria rubric always has a strongest row; name it first, then name the one thing to change next.
- **Retries are already built in and encouraged.** Every quiz allows unlimited attempts, highest score kept; that is the course's own design, not an exception you are granting.
- **Use analytics to find students early, not to build a case.** A low outro confidence rating or a missed Tier 3 deadline is a reason to reach out this week, not a data point saved for a later conversation about consequences.
- **On suspected AI misuse or academic dishonesty, open a conversation first.** Ask the student to walk you through their Pixlr E layers, history, or process; a genuine original piece almost always has a visible build-up (sketch layer, iterative masking, an earlier draft saved to the portfolio folder). Treat the conversation as formation, not an accusation-first process.
- **Public critique comments model good thinking; they never single out weak work.** When you drop model comments in a discussion (per the build's own recurring teacher note), pick strong examples to spotlight, not weak ones to correct in public.

9 Weekly Announcement Scripts

9.1 Reusable template

[MODULE/WEEK N] ANNOUNCEMENT TEMPLATE

Hi artists, welcome to [Week N: focus]. This week you'll [one-line description of the lesson's core skill]. Your one must-not-miss item is [Tier 3 project name], due [due date]. A lot of you found [tricky concept, if known from last outro] tricky last time. [One warm, specific encouragement]. As always, drop into office hours [time] if you want a hand.

9.2 Drafted scripts, per module opening

Module 1, Week 1: "Welcome to Digital Art Imaging! This week we answer a simple question: what actually counts as digital art? You'll set up Pixlr E, make your very first piece (a cover image that introduces you as an artist), and start your portfolio folder. Don't worry about making it perfect. This is about getting comfortable in the software and making a few choices on purpose. Due [date]. See you in office hours [time]."

Module 2, Week 1: "Quarter 2 starts with light and motion: how a still photo can make you feel a texture or sense that something is moving. Grab your phone or camera this week; the project asks for two original photos, one texture, one movement. [Confidence-check line if last module's outro flagged Pixlr E layers as unclear]. Due [date]."

Module 3, Week 1: "Welcome to Collage & Typography. This week is about combining images with intention: layers, masks, and blend modes instead of scissors and glue. Your first collage doesn't need to be complicated, three images and one deliberate seam decision is plenty. Due [date]."

Module 4, Week 1: "Final quarter! We start with drawing: proportion and form, the skills behind every convincing figure or object. This is also the quarter that ends in your Final Portfolio, so start saving your strongest pieces from every module now if you haven't been. Due [date]."

9.3 Situational scripts

Mid-module check-in (low confidence flag): "A few of you rated your confidence low on [skill] in the last outro survey. That's useful information, not a problem. [Specific tip or resource]. If you want extra help this week, grab a slot in office hours or send me a message; that's exactly what they're for."

Pre-capstone reminder: "[Capstone project name] is due [date] and it's worth more than a usual week's project, so give yourself real time in Pixlr E, not just the last night. [One specific requirement students often miss]. Questions welcome any time before the deadline."

Re-engagement nudge (quiet student): "Hi [name], I noticed I haven't seen your [item] yet, just checking in, no judgment. Life happens. Let me know if something's in the way or if you need an extra day; I'd rather work it out with you now than have it pile up."

10 Teacher Workflow & Workload Map

10.1 A normal week, in order

1. Triage the module's outro-wrapper analytics if this is a module's closing week (Section 2.2), ~15–20 min.
2. Batch-read and score the week's discussion(s), dropping 2–3 public model comments (Section 6.3/7).
3. Grade the week's one Tier 3 project against the standard rubric (Section 6.1), ~5 min/student.
4. Post the weekly announcement (Section 9).
5. Answer student/family messages as they come in, using Ignite AI to draft where useful (Section 4).

Time budget, per the optima-canvas-assignments tier system: roughly 0 hours on Tier 1 items (auto-graded), 2–3 hours per cycle on Tier 2 discussions, and 8–12 hours per cycle on Tier 3, spread across the grading window rather than done in one sitting.

10.2 Heavy weeks, flagged

- **Module 1, Week 8** — quarter capstone: multi-photo "My Strongest Work" submission + Photography Critique discussion.
- **Module 2, Week 7** — semester capstone: 3-photo series + 100–150-word artist statement.
- **Module 3, Weeks 3–4** — the marquee Surrealism Collage spans two weeks (plan on grading once, at Week 4).
- **Module 3, Week 8** — quarter capstone with a *distinct* rubric to learn (Section 6.2); budget extra prep time the first time you grade it.
- **Module 4, Weeks 2–3 and 5–6** — two more two-week marquee projects (Mosaic, Animation).
- **Module 4, Weeks 7–8** — back-to-back capstones: the Final Project (with a statement to check for genuine, non-generic reasoning) immediately followed by the Final Portfolio (a full multi-page document per student, the single heaviest grading event of the year).

10.3 Workload-fluctuation graphic

Relative facilitator-grading load by module, derived from each module's count of Tier 3 grading events, multi-week projects, and capstones (Sections 5.4 and 10.2). Cyan = steady/moderate, gold = elevated (a new rubric or a two-week project), coral = heaviest (back-to-back capstones). Plan extra time on the coral module.

10a Adapting to a Live, 4-Day-a-Week Course

This course was built async, but the same content maps onto a live, 4-day-a-week class without rewriting anything. The pattern below is a starting point, not a rule; shift it whenever a real class needs more or less time on a given day.

10a.1 The 4-day live template

DAY	MAPS TO (ASYNC CONTENT)	WHAT HAPPENS LIVE
Day 1	Essential Question + Part 1 Look First visual + hook	Open with the week's visual/concept hook and Essential Question as a live discussion; teach the core concept (Parts 1–2 of the lesson) directly.
Day 2	Part 2/3 teaching cards + Pixlr E workflow callout	Guided, live software walkthrough: teacher demonstrates the week's Pixlr E technique step by step while students follow along on their own canvases.
Day 3	The Tier 3 project + Tier 2 discussion prompt	Studio/work day: students build the week's graded project in class with the teacher circulating; the discussion prompt becomes a live peer-feedback conversation instead of (or in addition to) a Canvas post.
Day 4	Tier 1 quiz + wrap-up	Students finish and submit the Tier 1 quiz, then the class does a short live critique/wrap-up of that week's projects before moving on.

10a.2 Week-by-week live schedule (all 32 content weeks)

Focus, Day 1–4, and the adaptation tip below name that week's actual project, quiz, and discussion, read directly from the build (Sections 1.3, 5.4, and 6). Each module's Week 9 is a catch-up/flex week with no lesson file; run it as an open-studio/catch-up day using the 4-day template's Day 3 pattern (studio time + individual conferencing), not a new row.

MOD/WK	FOCUS	DAY 1	DAY 2	DAY 3	DAY 4	ADAPTATION TIP
MODULE 1 • Q1						
1.1	What Is Digital Art?	Pixel/raster vs. vector hook	Pixlr E setup demo	Build "This Is Me as a Digital Artist"	Quiz: Foundations of Digital Art + share covers	Have every student's canvas open by end of Day 2 so Day 3 is pure build time.
1.2	Elements of Art & Principles of Design	Elements/Principles hook	Demo focal-point technique	Build Art Lesson & Reflection	Quiz: Elements & Principles + Spot the Principle discussion live	Run "Spot the Principle" as a live gallery walk instead of a Canvas post.
1.3	Shape & Creating Digital Color	Color wheel/RGB hook	RGB/HSL picker demo	Build Creating Digital Color	Quiz: Shape & Digital Color	Do "Choose Your Scheme" as a Day 1 quick-share so students commit to a scheme before building.
1.4	Drawing & Editing Shapes	Raster vs. vector recap + layers hook	Shape-tool/layer demo	Build "Two Are Better Than One"	Quiz: Drawing & Editing Shapes + share new objects	Pair students for "Two Shapes, One Idea" planning live on Day 1.
1.5	Photography: Line & Space	Rule-of-thirds/leading-line hook	Phone-camera composition walk (outdoors/hallway if possible)	Shoot & upload photo	Quiz: Line and Space + critique circle	Day 2 works best moved outside or to a hallway so students actually shoot during class.

1.6	History of Photography & Taking Digital Photographs	Camera-obscura-to-smartphone timeline	Inclusion/exclusion shooting demo	Shoot both intentional photos	Timeline Match + quiz	Timeline Match works well as a live team relay on Day 1.
1.7	Photography Inspiration	Ordinary-object case studies	Build shot lists live	Shoot & edit "Ordinary Extraordinary"	Quiz + Shot List Share	Have students trade shot lists on Day 2 for quick peer suggestions before shooting.
1.8	Photography Discussion + Module Assessment	Module 1 review game	Select strongest 2–3 photos	Photography Critique live, then finalize reflection	Module 1 Review quiz + submit "My Strongest Work"	Run the critique protocol live in pairs on Day 3; it is the same 4-step protocol already built into the discussion.
MODULE 2 · Q2						
2.1	Texture & Movement	Implied texture/movement hook	Lighting-for-texture demo	Shoot texture + movement photos	Quiz + Texture and Mood discussion live	Do the Mini Lesson warm-up (spotting texture/movement) as a fast Day 1 pairs activity.
2.2	Digital Photography Techniques & Perspective	Bird's/worm's-eye hook	Perspective shooting demo	Shoot two-perspective pair	Quiz + Perspective Choices discussion	Light Direction Scavenger Hunt works as a Day 1 walk around the building.
2.3	Capturing the Light	Color temperature/mood hook	Natural vs. artificial light demo	Shoot natural/artificial pair	Quiz + Warm or Cool discussion	Exposure Sort works as a quick Day 1 sorting activity with printed/projected sample photos.
2.4	Editing: Emphasis & Non-Digital Editing	Six emphasis methods hook	DIY filter/framing tool demo (bring cellophane, cardboard tubes)	Shoot emphasis + DIY-tool photo	Quiz + DIY Tool Test discussion	Bring physical DIY tools (cellophane, tube, small mirror) for a hands-on Day 2.
2.5	Editing & Correct the Exposure	Layers-before-editing hook	Live Pixlr E exposure-tool demo	Edit exposure on provided/own photo	Quiz + Fixing the Exposure discussion	Day 2 demo should show duplicating the layer live so no one edits an original by accident.
2.6	Color Adjustments & Filters	Vibrance vs. Saturation hook	Live Pixlr E blur/color demo	Edit color + blur on own photo	Quiz + Tasteful or Too Much? discussion	Do "Tasteful or Too Much?" as a live before/after comparison using two student edits.

2.7	End-of-Semester Project	Capstone requirements walkthrough	Plan and begin shooting the 3-photo series	Edit series + draft artist statement	Quiz + Share Your Planned Theme live critique	Move "Share Your Planned Theme" to Day 1 so peer feedback can still shape shooting on Day 2.
2.8	End-of-Semester Quiz	Semester 1 review game	Open studio: finish/polish any late work	Semester 1 Reflection discussion live	Semester 1 Comprehensive Quiz	No new project this week; use Days 2–3 as a genuine catch-up buffer before Quarter 3.

MODULE 3 • Q3

3.1	Intro to Digital Collage	Layers/masking hook + Dada history	Live masking/blend-mode demo	Build First Digital Collage	Quiz: Collage Foundations + Combined Meaning discussion	Do the masking practice (Tier 1) live on Day 2 before students touch their own collage.
3.2	Balance	Symmetrical/asymmetrical/radial hook	Live balance-arrangement demo	Revise/build Balance composition	Quiz: Balance in Composition	Three Balance Sketches works well as a fast Day 1 whole-class demo-and-copy.
3.3	Surrealism Collage (begins)	Surrealism/subconscious hook	Plan concept + review masking/blend techniques	Begin building in Pixlr E	Quiz: Surrealism	Have every student leave Day 1 with their one-sentence concept written down; Day 3 build time depends on it.
3.4	Collage Studio (Surrealism finishes)	Self-critique checklist walkthrough	Peer critique live, in pairs	Revise based on critique	Finalize & submit Surrealism Collage	Model one full critique publicly on Day 2 before pairs critique each other.
3.5	Intro to Typography & Rhythm	Serif/sans-serif hook	Type Scavenger Hunt live (posters/signage in the building)	Build Type Hierarchy Exercise	Quiz: Typography Fundamentals + Reading the Rules discussion	Send students hunting for serif/sans-serif examples in the building itself on Day 2.
3.6	Typography	Display vs. body type hook	Font-pairing demo	Build Expressive Type Poster	Quiz: Expressive Type & Font Pairing + Letters With a Mood discussion	Mood Matching Warm-Up works as a quick Day 1 whole-class demo on one shared canvas.
3.7	Charles Demuth	"I Saw the Figure 5 in Gold" close look	Text-as-shape technique demo	Build Text-in-Art Study	Quiz: Demuth & Text in Art + Reading Demuth's Figure 5 discussion	Assign the "Find Your Own Text-in-Art Example" research for Day 1 homework so Day 1 class time is

discussion, not searching.

3.8	Typography Project	Capstone requirements walkthrough (distinct rubric)	Thumbnail sketching (Poster Plan Check-In)	Build the poster/ad	Typography Critique live, then finalize/submit	Introduce the distinct capstone rubric explicitly on Day 1 since it differs from every prior week's rubric.
-----	--------------------	---	--	---------------------	--	---

MODULE 4 • Q4

4.1	Digital Drawing: Proportion & Form	Proportion/form hook	Value Scale Warm-Up + shading demo	Build Proportion & Form Drawing (sketch/line/shade layers)	Quiz: Proportion & Form + Spotting Proportion and Form discussion	Do the Value Scale Warm-Up as a whole-class Day 2 opener before individual sketching.
4.2	Mosaic Art	Roman/Byzantine/Mesoamerican mosaic history hook	Tile-by-tile/grid-overlay demo	Begin building Digital Mosaic	Quiz: Mosaic Art + Choosing Your Mosaic Subject discussion	Have students commit to subject + grid scale on Day 1 so Day 3 build time is not wasted re-planning.
4.3	Drawing Studio (Mosaic finishes)	Self-critique (describe/analyze/interpret/judge) walkthrough	Peer critique live, in pairs	Refine mosaic based on feedback	Finalize & submit Digital Mosaic	Model the four-step critique publicly on Day 1 before pairs run it themselves.
4.4	Intro to Animation & Unity	Frame/keyframe/unity hook	Frame Planning Sheet + Pixlr E frame-layer demo	Build and export 3–5 frames	Quiz: Animation Fundamentals + assemble GIF + Unity in Motion discussion	Demo the GIF-assembly tool live on Day 4 so no one gets stuck on the last step after class.
4.5	Animation Project (begins)	Storyboarding hook	Storyboard the loop (4–8 frames)	Build frames in Pixlr E	Quiz: Frame-Based Animation Basics + assemble draft GIF	Storyboards should be finished and checked by end of Day 2, since Day 3 build time depends on them.
4.6	Animation Studio (finishes)	Final Frame Export Check walkthrough	Peer critique live (3-part protocol)	Refine loop based on feedback	Finalize & submit Animation Project; optional sound-effect extension	Offer the optional silent-video-plus-sound extension as a Day 4 enrichment task for students who finish early.
4.7	Final Project	Medium-choice planning (photo/collage/type/drawing/animation)	Independent build time, teacher circulates	Continued build + draft artist statement	Quiz: Final Project Readiness + submit	Require the Final Project Planning Scaffold before Day 2 so build time isn't lost to

						indecision about medium.
4.8	Final Portfolio	Portfolio File Check + shortlist review	Curate 6–10 pieces, choose chronological or thematic order	Build captions + format in Word/PowerPoint	Portfolio Showcase live, then submit	Run the showcase as an actual gallery walk or share-out; it is the last live moment of the course.

11 Standards Coverage Map

[VERIFY] Only standard codes are recorded in this course's build files (each `_module-N-map-and-wrappers.md` lists a flat code list per quarter, with no lesson-level mapping and no code descriptions). VA.912 strand letters conventionally stand for Critical Thinking, Historical/Global Connections, Organizational Structure, Skills/Techniques/Processes, and Innovation/Technology, but this session did not verify each code's exact CPALMS description against the CPALMS database itself; pull full descriptions from CPALMS before publishing this table anywhere it will be relied on for compliance reporting.

11.1 By module (quick reference)

MODULE / QUARTER	STANDARDS CARRIED
Module 1 (Q1)	VA.912.C.1.1, C.1.3, C.2.1, H.1.1, H.2.2, O.1.1, O.2.1, S.1.3, S.2.1, S.3.4
Module 2 (Q2)	VA.912.C.1.1, C.1.3, C.2.1, H.1.1, H.2.2, O.1.1, O.2.1, S.1.3, S.2.1, S.3.4
Module 3 (Q3)	VA.912.C.1.4, C.2.2, C.3.1, H.1.4, H.2.3, H.3.1, O.3.2, S.2.3, S.3.2, F.1.1
Module 4 (Q4)	VA.912.C.2.4, C.3.3, H.3.2, O.1.4, O.3.3, S.3.3, S.3.5, F.2.2, F.3.1

[VERIFY] Module 1 and Module 2 carry the identical ten-code list, which may be intentional (skills spiral and reinforce across Q1–Q2, since both quarters are foundations/photography-heavy) or may be a copy-paste artifact from the build. Confirm with whoever owns the standards alignment before this table is used for compliance purposes.

11.2 By standard (codes only; assessed generally via that quarter's quizzes, discussions, and projects)

The build does not map individual codes to individual weeks or lessons, only to the quarter as a whole; a week-by-week breakdown would be invented, not read, so it is intentionally omitted here. Codes never appear on any student-facing page, per the course's own build convention.

12 What Makes This Course Classical & Cultivating Culture

12.1 What makes it classical

- **Primary-source encounter with the actual artwork, not a description of it.** Every embedded image is a real public-domain work with a direct museum/archive source link (Van Gogh's *The Bedroom* and Toulouse-Lautrec's *Moulin Rouge, La Goulue* via the Art Institute of Chicago in Module 1 Week 1; Henry Peach Robinson's *Fading Away* via Wikimedia Commons in Module 3 Week 1; Charles Demuth's *I Saw the Figure 5 in Gold* via the Metropolitan Museum of Art in Module 3 Week 7). Where a work is still under copyright (Hannah Höch, Andy Warhol, Jasper Johns), the course sends students to the museum's own page rather than embedding an unlicensed image, which is itself a lesson in respecting artists' rights.
- **Craft mastery through worked example, then guided practice, then independent production** — the Look First → teaching cards → Tier 1/2 practice → Tier 3 project structure repeats in all 32 lessons.
- **A live studio-critique tradition**, not just a rubric score: the describe/analyze/interpret/judge and what-works/what's-unclear/one-suggestion protocols (Section 6.3) are the same structured-critique tradition working ateliers have used for generations, applied to Pixlr E work.
- **History taught through the object, not a timeline recited at students:** the camera obscura to smartphone arc (Module 1 Week 6), Roman/Byzantine/Mesoamerican mosaic techniques (Module 4 Week 2), and the Dada-to-Surrealism lineage (Module 3 Weeks 1 and 3) are each anchored to a specific technique students then practice themselves.
- **A named virtue thread** running through every module's outro wrapper: perseverance and honesty (Module 1), patience and honest self-assessment (Module 2), imagination and honest self-critique (Module 3), perseverance and honesty especially in critique (Module 4).

12.2 Cultivating culture asynchronously

- Treat the weekly discussion as a real seminar, not a checkbox: read every post, and actually drop the 2–3 public model comments the build repeatedly asks for, naming students by their actual insight.
- Use the outro triage (Section 2.2) to write announcements that reference real, specific student confusion, not a generic "great work this week."
- Keep the virtue thread visible: name it in an announcement when you see a student actually practice patience through a failed exposure edit or honesty in a self-critique, not only when the wrapper asks them to reflect on it.
- Treat every piece of feedback as relationship, not transaction: the same student will read your comments on 28 projects this year; consistency in tone builds the trust that makes coaching (Section 8) actually land.

13 Sensitive-Content Flags & Family/Student Scripts

FINDING: NOTHING REQUIRING A FAMILY NOTICE

This section was actually checked, not assumed. Every one of the 32 `lesson.html` files was grepped for mature-photography subject matter, difficult artist biographical material, and contested-imagery keywords (nudity, violence, death, self-harm, abuse, trauma, war, drugs, alcohol, weapons, assault), and the Module 3 map/source notes and the Charles Demuth lesson (Module 3, Week 7) were read in full given the user's specific request to check Dada/Surrealism/Demuth content. The only match anywhere in the entire course is a single, brief, factual reference to World War I as the historical backdrop for the Dada art movement (Module 3, Week 1): "Dada began in 1916 in Zurich, Switzerland, during World War I... Many artists felt that the war had shown reason and tradition to be a failure." This is routine art-history context, not graphic or extended, and comparable to what any survey art or history course would include. The Surrealism lesson (Module 3, Week 3) covers dreams and the subconscious mind in purely academic terms (Dalí, Magritte); the Charles Demuth lesson (Module 3, Week 7) covers only Precisionism, the painting's museum provenance, and its poem source, with no biographical material of any kind, difficult or otherwise. Hannah Höch's photomontages are described only as addressing "gender, politics, and identity" in general survey terms and are never embedded (link-out only, since her work is still under copyright). No family-notice script is needed for this course as built.

[VERIFY], not a sensitive-content matter but worth a facilitator's awareness: three lesson topics carry a `<!-- THIN SOURCE -->` comment in the build (Module 3 Weeks 5–8, Typography beyond Charles Demuth; Module 4 Week 4, Animation), meaning they were authored from general art fundamentals rather than a specific verified source text, per the build's own convention. This does not affect accuracy, but a facilitator reviewing those weeks closely for the first time should know they were treated slightly more generally than the VIP-sourced weeks.
