Do not publish this document, or any part of it, to students. Standards codes on this page are for facilitator reference only — they never appear on student-facing pages.

OPTIMA ACADEMY ONLINE · TEACHER MANUAL

English 1 (Florida course 1001310) — 9th Grade ELA

Justice and duty across seven texts, two semesters, thirty-five weeks · Prepared 2026-07-15

CONTENTS

1. How this course works (incl. adapting to a live, 4-day class)

2. Ungraded interactives & the intro/outro wrappers

3. AI & VR in this course (student-facing)

4. Using Ignite AI to support students (teacher-facing)

5. Grading categories & Canvas gradebook setup

6. Rubrics for every teacher-graded item

7. Discussions, quizzes & interactive activities — how to run & grade
8. Coach, not catch

9. Weekly announcement scripts

10. Teacher workflow & workload map

11. Standards coverage map (CPALMS & Texas comparison)

12. What makes this course classical & cultivating culture

13. Sensitive-content flags & family/student scripts

1 How This Course Works

English 1 runs across **seven modules and thirty-five weeks**, split into two semesters: **Semester 1** (Modules 1–4 — *Electra*, *Sir Gawain and the Green Knight*, *The Canterbury Tales*, Shakespeare's sonnets — 18 weeks) and **Semester 2** (Modules 5–7 — short stories, *The Scarlet Letter*, *The Crucible* — 17 weeks).

A TYPICAL LESSON

Each lesson page opens with a metadata strip (module, week, estimated time) and a "What you're reading/learning today" card, followed by stated objectives, a materials list, then the day's activities: a short warm-up, the core teaching (one focused idea, not a survey), an identify/practice step, and a "Check Your Understanding" self-check the student scores themselves (an ungraded <details> accordion — costs you nothing). Two grammar lessons and one Quick Write happen every week alongside the literature lessons.

A TYPICAL WEEK

| Component                                      | What the student does                                                      | Graded?            | Tier            |
|------------------------------------------------|----------------------------------------------------------------------------|--------------------|-----------------|
| 2 literature lessons                           | Close reading, PD source link, one embedded visual, 1–2 self-check widgets | No                 | 4<br>(ungraded) |
| 2 grammar lessons                              | Sentence-level craft tied to that week's text; self-check                  | No                 | 4<br>(ungraded) |
| Word Study (vocabulary)                        | Context-based definitions from the reading; copia practice                 | Light / completion | 1               |
| 1 Quick Write                                  | Short low-stakes draft feeding the module project                          | Completion         | 1               |
| 1 solo VR activity                             | Student-chosen location, generic tools, spatial reflection or annotation   | Completion         | 1               |
| Comprehension quiz                             | Canvas-native auto-graded quiz on the week's reading                       | Yes, auto          | 1               |
| Biweekly grammar+vocab game (weeks 2, 4, 6...) | SCORM-packaged widget; posts a score to the gradebook                      | Yes, auto          | 1               |
| 1 discussion per module                        | Structured prompt + one substantive reply                                  | Light rubric       | 2               |
| Module project feeder                          | One scaffolded step toward the module's final essay/project                | Completion/light   | 1–2             |

MAJOR ASSESSMENTS

| Item                                                                     | Tier     | Your grading time                                   |
|--------------------------------------------------------------------------|----------|-----------------------------------------------------|
| Module project final (one per module — essay, sonnet, or creative piece) | 3        | ~5 min/student with the standard rubric (Section 6) |
| Module discussion (one per module)                                       | 2        | ~30 sec/post + 2–3 public comments                  |
| Module outro wrapper                                                     | 4 (data) | 15–20 min triage per module (Section 2)             |
| Biweekly grammar+vocab quiz                                              | 1        | 0 (auto-scored)                                     |

ADAPTING THE ASYNCHRONOUS LESSONS TO A LIVE COURSE MEETING 4 DAYS A WEEK

The content is identical for On-Demand and Live sections; what changes is pacing and where your presence lands. Each standard module week has roughly **7 discrete pieces** (2 literature lessons, 2 grammar lessons, 1 Quick Write, 1 VR activity, 1 quiz/discussion beat). Mapped onto four live meetings:

| Live day | What to run in class | What stays independent work |
|----------|----------------------|-----------------------------|
|----------|----------------------|-----------------------------|

|              |                                                                                                                                                                                                                                                                     |                                                                                                                               |
|--------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| <b>Day 1</b> | Literature Lesson 1 — read the day's excerpt together or have students read silently, then discuss the close-reading questions as a class instead of a solo self-check. This is your best day for the discussion prompt if the module's discussion opens this week. | Word Study vocabulary (assign as independent pre-work before Day 1, so class time is spent applying words, not defining them) |
| <b>Day 2</b> | Grammar Lesson 1 — teach the sentence-level skill on the board with the lesson's own example sentences, then have students apply it live to a sentence from the week's text.                                                                                        | Comprehension quiz (assign for completion before or after Day 1; keep it auto-graded, do not re-teach it live)                |
| <b>Day 3</b> | Literature Lesson 2 + Quick Write — discuss the second half of the week's reading, then use the last 10–15 minutes as guided drafting time for the Quick Write so struggling writers get help while they write, not after.                                          | —                                                                                                                             |
| <b>Day 4</b> | Grammar Lesson 2 + VR activity — teach the second grammar point, then move into VR together as a class "session" even though each student's activity is solo; this turns an async completion task into a shared live experience without changing what's graded.     | Module project feeder for the week (assign as homework, check for completion at the start of the next Day 1)                  |

Pacing notes by module: Module 4 (Sonnets, 3 weeks) and Module 7 (*The Crucible*, 4 weeks) run tighter cycles — consider combining Day 1 and Day 3 content into one longer class discussion in a short week rather than dropping a component. Module 5 (Short Stories, 8 weeks) is the most repeatable rhythm; once your class has run it twice, students will know the pattern and Day 1–4 transitions get faster. In every module, the discussion and the module project final are the two items worth protecting live class time for — everything else can flex to independent time if a week runs short.

## 2 Ungraded Interactives & the Intro/Outro Wrappers

Self-check widgets inside lessons (flashcard flips, single-select checks, the reflective "no wrong answer" check-ins) cost you nothing — students score themselves and move on. Do not grade these and do not ask students to submit proof of completion; their only job is formative practice.

Every module opens and closes with a Canvas Quiz in survey mode — not a wiki page. The **intro wrapper** captures the student's first answer to the module's essential question and a group-work opt-in. The **outro wrapper** captures their revised answer, a confidence rating, what's still unclear, and a one-line reflection on the virtue the module asked of them.

**The 15–20 minute move:** after outro-quiz responses come in, sort by confidence rating. Read the low-confidence "what's unclear" responses first — that's your early-warning list. A short reply or a targeted announcement (Section 9) to that group is more efficient than re-teaching the whole class.

## 3 AI & VR in This Course (Student-Facing)

**AI.** Each module places one gold-bordered AI-awareness callout tied to that week's task — e.g., AI can define a word but can't tell a student what it means in that line; AI can check grammar on a draft but shouldn't write the draft. These are factual, not persuasive: they state what AI can and can't responsibly do for that task and stop. No specific AI tool is required or named as mandatory anywhere in the course.

**VR.** Every VR activity is solo, student-chosen-location, and platform-agnostic (no named VR platform, no hard-coded session mechanics) — a generic "record a short spatial reflection" or "annotate on a virtual board" instruction that works on whatever VR platform Optima's students are using at the time. For in-copyright works, VR stays generic/archetypal rather than recreating named scenes or dialogue.

4 Using Ignite AI to Support Students (Teacher-Facing)

[VERIFY] The specifics of Ignite AI's current feature set should be confirmed against Canvas's live tool before relying on the workflows below; the categories of use are stable, but exact menu paths and feature names may have changed.

- **Drafting feedback.** Use Ignite to generate a first-pass comment on a student's module project draft against the standard rubric (Section 6), then edit it in your own voice before posting — it should read as your feedback, not a generic AI comment.
- **Summarizing analytics.** Ask Ignite to summarize outro-wrapper confidence trends or quiz-item difficulty across the cohort so you can spot a module-wide misconception quickly.
- **At-risk nudges.** Use gradebook/analytics summaries to flag students with a pattern of late or missing work, then send a short, individual check-in rather than a generic reminder.
- **Practice variants.** Generate additional practice sentences for a grammar point or additional context-clue sentences for a vocabulary word when a student needs more repetition than the lesson provides.
- **Family communication.** Draft a first pass of a progress update or a sensitive-content notice (Section 13), then personalize before sending.

Introduce these uses gradually rather than all at once: start with feedback drafting and analytics summaries in Module 1, add the others as you find time in your week.

5 Grading Categories & Canvas Gradebook Setup

Set up four assignment groups matching the syllabus's grading breakdown:

| Assignment group   | Weight | What lives here                                                                                       |
|--------------------|--------|-------------------------------------------------------------------------------------------------------|
| Weekly Assignments | 50%    | Grammar/vocab quizzes, comprehension quizzes, Quick Writes, biweekly SCORM game                       |
| Module Projects    | 30%    | Feeders (completion/light) + the module's final essay or creative piece (Tier 3, rubric-graded)       |
| Discussions & VR   | 20%    | One discussion per module, weekly VR completion, module outro/intro wrappers (completion credit only) |

**Setup steps:** Course > Settings > Grading Schemes (confirm the school's standard scheme is applied) → Assignments > add the three groups above with the listed weights → enable "Weighted Grade" under Assignments > group weights → as you build/import each item, assign it to the correct group so the gradebook total calculates automatically. Use Gradebook > Individual View or the Learning Mastery Gradebook if you want a standards-referenced view layered on top (optional; not required to run the course).

GRADEBOOK MAP

| Item                          | Group              | Points/Weight               | Grading method            |
|-------------------------------|--------------------|-----------------------------|---------------------------|
| Comprehension quiz (weekly)   | Weekly Assignments | 10 pts                      | Auto                      |
| Grammar+vocab game (biweekly) | Weekly Assignments | 20 pts                      | Auto (SCORM)              |
| Quick Write                   | Weekly Assignments | 10 pts, completion          | Completion                |
| Project feeder                | Module Projects    | 10–15 pts, completion/light | Completion or 2-pt check  |
| Module project final          | Module Projects    | 100 pts                     | Rubric (Section 6)        |
| Discussion                    | Discussions & VR   | 15 pts                      | 3-pt participation rubric |
| VR activity                   | Discussions & VR   | 10 pts, completion          | Completion                |
| Intro/outro wrapper           | Discussions & VR   | 5 pts, completion           | Completion (survey)       |

6 Rubrics for Every Teacher-Graded Item

One consistent 4-criteria rubric covers every module project final, so grading stays close to five minutes per student:

| Criterion                         | Exemplary                                                      | Proficient                                | Developing                          | Beginning                        |
|-----------------------------------|----------------------------------------------------------------|-------------------------------------------|-------------------------------------|----------------------------------|
| Understanding of the material     | Insightful, accurate grasp of the text                         | Accurate grasp of the text                | Partial or surface grasp            | Misreads the text                |
| Quality of reasoning              | Claim is well-supported and anticipates objections             | Claim is supported with relevant evidence | Claim is asserted with thin support | No clear claim or support        |
| Clarity & precision of expression | Clear, controlled, and precise throughout                      | Generally clear and organized             | Uneven clarity or organization      | Difficult to follow              |
| Intellectual honesty              | Explicitly names the limits of its own claim or interpretation | Does not overstate certainty              | Overstates certainty in places      | Presents guesses as settled fact |

Discussion posts use a simple 3-point participation rubric: **3** = a specific claim with reasoning, plus a substantive reply to a classmate; **2** = one of the two; **1** = a post submitted but thin (e.g., "I agree") on both parts.

FREE-RESPONSE QUIZ QUESTION ANSWER GUIDES

Each module's comprehension quiz (built as a Canvas-native .md spec per module) includes 1–2 short free-response items alongside auto-graded multiple choice. Answer guides for these live in each module's canvas-quizzes/ folder alongside the quiz spec — confirm each spec includes a model answer before publishing.

## 7 Discussions, Quizzes & Interactive/Assessment Activities

**Discussions** (Tier 2): one per module, built as a native Canvas Discussion with a specific prompt (a claim + reasoning, then a reply to a classmate). Grade in batches with the 3-point rubric above; drop 2–3 public comments per discussion that model good reasoning or correct a common misread.

**Comprehension quizzes** (Tier 1): weekly, Canvas-native, auto-graded. **Module intro/outro wrappers** (Tier 4): Canvas Quiz in survey mode, ungraded except for completion credit — see Section 2.

**Biweekly grammar+vocab game** (Tier 1): a themed, SCORM-packaged widget (per module — see the theming list below) that posts its score directly to the gradebook. Off-week practice versions of the same widget are ungraded GitHub-Pages iframes with unlimited tries.

| Module               | Item                              | Type              | Tier | How to grade     |
|----------------------|-----------------------------------|-------------------|------|------------------|
| 1 — Electra          | Justice discussion                | Discussion        | 2    | 3-pt rubric      |
| 1 — Electra          | Weekly comprehension quizzes (×5) | Quiz              | 1    | Auto             |
| 2 — Sir Gawain       | 4 discussions (one per week 2–5)  | Discussion        | 2    | 3-pt rubric each |
| 3 — Canterbury Tales | 5 discussions (one per week)      | Discussion        | 2    | 3-pt rubric each |
| 4 — Sonnets          | Weekly comprehension quizzes (×3) | Quiz              | 1    | Auto             |
| 5 — Short Stories    | Discussion + 8 weekly quizzes     | Discussion / Quiz | 1–2  | Rubric / Auto    |
| 6 — Scarlet Letter   | Discussion + weekly quizzes       | Discussion / Quiz | 1–2  | Rubric / Auto    |
| 7 — Crucible         | Reading quizzes + 1 discussion    | Quiz / Discussion | 1–2  | Auto / Rubric    |

### BIWEEKLY WIDGET THEMING (PER MODULE)

| Module           | Theme           | Skin                                    |
|------------------|-----------------|-----------------------------------------|
| 1 Electra        | Greek theatre   | Masks / laurel / amphitheater           |
| 2 Gawain         | Arthurian       | Dragon-and-quest set                    |
| 3 Canterbury     | Pilgrimage      | Pilgrim-on-the-road progress bar        |
| 4 Sonnets        | Renaissance     | Quill / Globe theatre / sonnet-lines    |
| 5 Short Stories  | Literary arcade | Word-runner (gold/indigo)               |
| 6 Scarlet Letter | Puritan         | Scarlet-A / forest / meeting house      |
| 7 Crucible       | Salem 1692      | Candle / courtroom (generic, non-scene) |

## 8 Coach, Not Catch

Feedback names a next step a student can act on ("your evidence supports your claim, but say explicitly why it matters to the question of justice") rather than only a score. Where the platform allows it, let students revise and resubmit the module project's early feeders — the point of a feeder is to catch a weak thesis before it becomes a weak final essay, not to penalize the attempt.

Use analytics (outro-wrapper confidence, quiz-item difficulty, gradebook trends) to find struggling students before a missed deadline does. A short private check-in ("I noticed you rated this module 'still confused' — want to talk through it in office hours?") does more than a late-work warning.

If you suspect AI misuse or plagiarism, start from curiosity, not accusation: ask the student to talk you through their thinking or their process. Genuine understanding is usually easy to hear in conversation; its absence is informative without requiring a confrontation.

## 9 Weekly Announcement Scripts

Because students are asynchronous, your weekly announcement is your main visible presence for On-Demand sections. Template:

Hi Scholars — welcome to Week [#] of Module [#], [Module Title]. This week: [1-sentence preview of the reading/skill]. Due by [day]: [list 2–3 items, not everything]. One thing to watch for: [a common misconception or a heads-up about a tricky passage]. See you in [Study Hall / VR] on [day/time].

### ONE DRAFTED SCRIPT PER MODULE

| Module               | Sample opening announcement                                                                                                                                                                                                                       |
|----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 — Electra          | "Welcome to Electra. This week we meet a daughter who has waited years for justice her city won't give her. Read the opening scene and post your first take on this module's question — is Electra right to want vengeance? — in the intro quiz." |
| 2 — Sir Gawain       | "Welcome to Sir Gawain and the Green Knight. A knight's word is about to be tested in a way he didn't expect. Watch for the poem's alliterative rhythm this week — it's doing real work, not just decoration."                                    |
| 3 — Canterbury Tales | "Chaucer is about to introduce you to twenty-nine strangers on the road to Canterbury. The General Prologue moves fast — take it one portrait at a time, and start your own Pilgrim's Portrait notes early."                                      |
| 4 — Sonnets          | "Three weeks, four sonnets, one form. Sonnet 18 sets the pattern this week — find the volta (the turn) before you move on; it's the hinge the whole poem swings on."                                                                              |
| 5 — Short Stories    | "Eight weeks, eight short stories, one big idea: a short story has no room to waste. Every detail is doing a job. This week's story is your first chance to hunt for foreshadowing on purpose."                                                   |
| 6 — Scarlet Letter   | "Hester Prynne wears her guilt where everyone can see it. This week, ask what your town would make visible if it could."                                                                                                                          |
| 7 — Crucible         | "Salem, 1692: an accusation is often enough to end a life. Read carefully for who benefits each time someone else is named."                                                                                                                      |

### SITUATIONAL SCRIPTS

- **Check-in (low engagement):** "I haven't seen a submission from you since [date] — everything okay? Reply here or come to office hours; we can get you back on track without a scramble."
- **Pre-assessment:** "Before Friday's module project is due: the rubric rewards a clear claim and honest reasoning over length. Reread Section 6 of the syllabus if you want a refresher on what 'exemplary' looks like."
- **Re-engagement nudge:** "Quarter ends [date] — anything not submitted by then is a zero. If you're behind, tell me now; there's still time to catch up."

10 Teacher Workflow & Workload Map

A normal week: check outro-wrapper analytics from the prior module close (15–20 min) → grade the week’s discussion batch (~2–3 hrs across 500 students, spread over the week) → monitor gradebook for missing/late work and send targeted check-ins (~30 min) → during a module project’s due week, grade the Tier-3 final with the standard rubric (~4 hrs/day across the grading window).

ESTIMATED LOAD BY MODULE

## 11 Standards Coverage Map

English 1 (1001310) is governed by Florida's B.E.S.T. ELA standards: 24 major benchmarks + 6 supporting (K12.EE) + 2 ELD, per the CPALMS course description read for this build. A Texas comparison follows for reference (Optima's primary framework for this course is Florida's).

### BY STANDARD (FLORIDA B.E.S.T.)

| Standard | Skill                                      | Modules                                    | Status                                                                    |
|----------|--------------------------------------------|--------------------------------------------|---------------------------------------------------------------------------|
| R.1.1    | Key literary elements                      | M1, M5                                     | Strong                                                                    |
| R.1.2    | Universal themes                           | All modules                                | Strong (justice/duty spine)                                               |
| R.1.3    | Narrator perspective, irony/satire         | M3, M5                                     | Covered                                                                   |
| R.1.4    | Epic poetry                                | M2                                         | Covered                                                                   |
| R.2.1    | Informational text structures/features     | M6 (research week)                         | Planned                                                                   |
| R.2.2    | Support for central idea                   | M5, M6                                     | Covered                                                                   |
| R.2.3    | Rhetorical appeals for purpose             | M6                                         | Covered                                                                   |
| R.2.4    | Compare opposing arguments                 | M2, M3, M5                                 | Covered                                                                   |
| R.3.1    | Figurative language & mood                 | M2, M4, M5                                 | Covered                                                                   |
| R.3.2    | Paraphrase grade-level text                | M5                                         | Covered                                                                   |
| R.3.3    | Adaptations of classical/mythical texts    | M1, M2                                     | Covered                                                                   |
| R.3.4    | Author's use of rhetoric                   | M2 (grammar), M6                           | Covered — reinforce in M7 (courtroom rhetoric fits well)                  |
| C.1.2    | Narrative writing                          | M5                                         | Covered                                                                   |
| C.1.3    | Argumentative writing                      | M2, M3, M6                                 | Covered                                                                   |
| C.1.4    | Expository writing                         | M1                                         | Covered                                                                   |
| C.1.5    | Revision from feedback                     | Feeders, all modules                       | Covered (implicit)                                                        |
| C.2.1    | Oral presentation                          | Recitation, VR reflections                 | Covered                                                                   |
| C.3.1    | Grammar & conventions                      | All modules                                | Strong (2 lessons/wk)                                                     |
| C.4.1    | Research, multiple sources                 | M6 (research week, annotated bibliography) | Planned                                                                   |
| C.5.1    | Digital presentations                      | VR shares, M365                            | Light — make one presentation explicitly graded as "digital presentation" |
| C.5.2    | Online collaborative/publish-ready writing | M365 + OneDrive drafting                   | Light — tag one collaborative step explicitly                             |
| V.1.1    | Academic vocabulary in speaking/writing    | Biweekly quiz, copia, projects             | Covered                                                                   |

|                                      |                                                                 |                                         |                                                                |
|--------------------------------------|-----------------------------------------------------------------|-----------------------------------------|----------------------------------------------------------------|
| V.1.2                                | Etymology & derivations                                         | M1 (Greek roots), M2–3 (Middle English) | Covered                                                        |
| V.1.3                                | Context clues, connotation/denotation                           | Copia + context boxes, all modules      | Covered                                                        |
| K12.EE.1.1–6.1 / ELD.ELL.LA.1 / SI.1 | Evidence, complex text, inference, collaboration, format, voice | All modules                             | Covered structurally (close reading, discussion, MLA, rubrics) |

BY MODULE (QUICK REFERENCE)

| 7 — Crucible         | C.1.3 (closing synthesis essay), R.2.2/R.2.3 (courtroom rhetoric)       |

TEXAS COMPARISON (INFORMATIONAL — FLORIDA REMAINS THE GOVERNING FRAMEWORK)

Texas English I strands with strong overlap: oral language, comprehension/response, literary elements, author's craft, and the writing process all map cleanly onto the Florida R/C strands already covered above.

**Texas strands with little or no analog in this course:** self-sustained/self-selected reading (the course is entirely teacher-selected texts, with no independent-choice reading component); correspondence/letter writing as a taught genre (no module teaches this form explicitly, though Module 6's Week 1 Quick Write is functionally close); the full Texas inquiry-and-research strand (question development, source credibility, citation); and explicit instruction in logical fallacies (Florida's R.2.3/R.2.4 come close but don't name fallacies directly). These are informational only — Florida is the governing framework for this course.

12 What Makes This Course Classical & Cultivating Culture

Every module reads a primary text in a public-domain edition rather than a summary or adaptation — students meet Sophocles, the Pearl Poet, Chaucer, and Shakespeare in their own words, linked to a stable scholarly source (Perseus, Project Gutenberg, Wikisource) rather than a textbook digest. The course's single through-line question — what is owed, to others and to ourselves — carries across twenty-five centuries and asks students to hold Greek tragedy, medieval romance, and American Puritan fiction in the same conversation, which is the Great Conversation in miniature.

The classical oration and disputatio structures (claim, evidence, objections, replies) used in Modules 1 and 2 teach argument as a discipline of fairness to the other side, not just persuasion. Recitation and oral performance (built into Modules 3 and 4 especially) return literature to the ear, not just the page, in keeping with how these works were originally received. The weekly virtue reflection in each module's outro wrapper ties the reading back to Optima's seven virtues rather than treating literary study as content consumption alone — a scholar who reads Electra's confrontation with vengeance is asked not only what she thinks about it, but what courage or self-government looked like in the choice, and what it looks like in their own life.

13 Sensitive-Content Flags & Family/Student Scripts

| Module               | Content to flag                                                        | Advance-notice script                                                                                                                                                                                                                                                                                                                                    |
|----------------------|------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 — Electra          | Matricide, revenge killing (offstage/reported, classical convention)   | "This module reads Sophocles' Electra, a Greek tragedy in which a family's history of violence comes to a head. The play reports its most violent events rather than depicting them graphically, in keeping with classical Greek theatrical convention, and our lessons focus on the play's central question of justice rather than on graphic content." |
| 2 — Sir Gawain       | A beheading test/challenge (non-graphic, medieval romance convention)  | "This module reads the medieval romance Sir Gawain and the Green Knight, which opens with a ritual challenge involving an axe. The poem treats this as a test of honor rather than as violence for its own sake."                                                                                                                                        |
| 3 — Canterbury Tales | Bawdy humor and adult innuendo in some tales (e.g., the Miller's Tale) | "Chaucer's Canterbury Tales includes some tales with crude humor typical of medieval comic storytelling. We have selected tales and excerpts appropriate for a high-school classroom and focus on the work's satire of medieval social class."                                                                                                           |
| 6 — Scarlet Letter   | Adultery, public shaming (thematic, 19th-century prose)                | "The Scarlet Letter examines a Puritan community's public punishment of a woman for adultery. The novel's treatment is moral and psychological rather than explicit, and our focus is on themes of guilt, judgment, and redemption."                                                                                                                     |
| 7 — Crucible         | False accusation, hysteria, execution (a McCarthy-era allegory)        | "The Crucible dramatizes the Salem witch trials as an allegory for false accusation and mass hysteria. It includes intense courtroom scenes and references to execution. We connect its themes to conscience under pressure in any era, including our own."                                                                                              |

Use the relevant script (edited into your own voice) in a module's opening announcement or a family-facing note if your school requires advance notice for any of the above. None of these flags currently blocks the module from being taught — they exist so a family is never caught off guard.
