Full Year · Grade 6

Grade 6 Mathematics

OPTIMA ACADEMY ONLINE · COURSE SYLLABUS · [school year]

FACILITATOR [Your name]	EMAIL & OFFICE [your.email@optimaed.com] · 239.673.2801 (OAO Front Office)
FLORIDA COURSE **Florida 1205010** · Full-year course	OFFICE HOURS [Day & time · study-hall / VR link]
GRADE LEVEL **Grade 6** (Middle School)	FORMAT **On-Demand** (also offered live on the VR campus)

About this syllabus. This is the plan for the course as designed. It is a full-year Grade 6 mathematics course; On-Demand scholars pace through the nine modules across the four quarters of their enrolled year. On-Demand and live-school sections share the same content and expectations; exact pacing, scheduled dates, and a few activities may vary from section to section and term to term. Your facilitator will confirm the specifics for your section.

COURSE OVERVIEW

Grade 6 Mathematics is the bridge from elementary arithmetic to the algebra, geometry, and statistics ahead. Across nine modules, scholars deepen their command of the number system — rational numbers and their opposites, absolute value, and fluent operations with integers, decimals, and fractions — then put those skills to work: reasoning with ratios, rates, and percentages; building and solving expressions, equations, and inequalities; plotting on the full coordinate plane; measuring area, surface area, and volume; and collecting, displaying, and interpreting data. Most concepts are grounded in real-world situations, and every lesson pairs a short interactive lesson with independent practice and an immersive activity on Optima's VR campus. The course assumes that mathematical reasoning is a habit worth practicing — for its own sake and for every course and decision that follows.

WHAT SCHOLARS WILL LEARN TO DO

- Define, plot, order, and compare rational numbers, and interpret opposites and absolute value in real-world contexts.
- Perform all four operations with integers, positive decimals, and positive fractions with procedural fluency.
- Find greatest common factors, least common multiples, prime factorizations, and work with exponents.
- Write and interpret ratios, rates, and unit rates, and solve percentage problems.

- Translate, generate, evaluate, and solve algebraic expressions, one-step equations, and inequalities.
- Plot points in all four quadrants and solve distance, perimeter, and area problems on the coordinate plane.
- Find the area of triangles and quadrilaterals and the surface area and volume of right prisms and pyramids.
- Formulate statistical questions and represent and interpret data with mean, median, box plots, and histograms.
- Represent problems in multiple ways, reason through them, and check the reasonableness of solutions.
- Apply mathematics to real-world contexts and explain and justify their reasoning.

COURSE MAP — MODULES BY QUARTER

The course is organized into nine modules across four quarters. On-Demand scholars pace to their own enrolled term; live sections follow the class schedule, keeping the modules roughly in order.

MODULE	QUARTER	WHAT YOU'LL STUDY
Module 1	Quarter 1	Integers, Rational Numbers, and Absolute Value
Module 2	Quarter 1	Operations on Fractions and Decimals
Module 3	Quarter 1	Factorization, Composition, and Exponents
Module 4	Quarter 2	Ratios, Rates, Percentages, and Conversions
Module 5	Quarter 2	Integers — Operations and Order of Operations
Module 6	Quarter 3	Algebraic Expressions, Inequalities, and Equations
Module 7	Quarter 3	Collecting, Using, and Interpreting Data
Module 8	Quarter 4	The Coordinate Plane
Module 9	Quarter 4	Area, Surface Area, and Volume

Semester split: Semester 1 covers Modules 1–5 (Quarters 1–2); Semester 2 covers Modules 6–9 (Quarters 3–4).

IMPORTANT DATES — 2026–2027

Aug 12, 2026	First day of school	**Sep 7**	Holiday (Labor Day)
Oct 9	Quarter 1 ends	**Oct 12**	Holiday (Columbus Day)
Nov 11	Holiday (Veterans' Day)	**Nov 23–27**	Thanksgiving break
Dec 18	Quarter 2 ends · fall semester ends	**Dec 21–Jan 1**	Winter break
Jan 5, 2027	Classes resume	**Jan 18**	Holiday (MLK Day)
Feb 15	Holiday (Presidents' Day)	**Mar 5**	Quarter 3 ends
Mar 26–Apr 5	Spring break	**Apr 6**	Classes resume
May 28, 2027	Quarter 4 ends · last day of school	**May 31**	Holiday (Memorial Day)

Dates follow the board-approved 2026–2027 academic calendar and may be adjusted by the school. Replace this section with your section's calendar if it differs.

ASSESSMENT & GRADING

Every lesson is graded through practice and checks; every module ends with a summative review and assessment; and each lesson carries an immersive VR component. The three graded categories are:

Practice & Checks

Independent Practice for every lesson plus one to two Mid-Module Checks. Unlimited attempts; check each answer as you go.

Category weight: [__%]

Module Summatives

A Summative Review (completion, unlimited attempts) and a Summative Assessment (graded for correctness, two attempts) in every module.

Category weight: [__%]

VR & Activities

Immersive VR Lesson Resources and periodic VR activities and projects that reinforce and extend the lesson.

Category weight: [__%]

How attempts work. Practice sets, Mid-Module Checks, and Summative Reviews have unlimited attempts and let you check each answer, review the concept, and try again — they are learning tools. Summative Assessments allow two attempts; answers are not shown, but you can check your work. **Category weights are set by your school or section** — fill them into the cards above, or confirm them in the Canvas gradebook.

HOW THIS COURSE IS DELIVERED

This course is offered in two formats that share the same content, assignments, and expectations: an **On-Demand (asynchronous)** section you pace yourself, and a **Live (synchronous)** section that meets on a schedule on Optima's VR campus. Find the overview that matches your enrollment.

ON-DEMAND (ASYNCHRONOUS) LEARNING

In the On-Demand section you move through the course at your own pace within each quarter, guided by due dates that keep you on track. All assignments for a quarter open at its start and close at its end. Because the course is On-Demand, there is no grade penalty for missing an individual due date — but any assignment not completed by the end of the quarter receives a zero, and assignments submitted in the final 14 days of a quarter receive a 10% deduction, so steady pacing matters.

Attendance is measured by assignment completion. Per school policy, a scholar who completes no assignment for ten consecutive school days, without notifying the school of an absence in advance, may be dropped from the course. Completion means a sincere attempt — real effort on real work. Rushed work, wrong or corrupted files, irrelevant or nonsense submissions, AI-generated filler, and word-salad responses do not count.

> **You are never on your own.** A live facilitator grades your work, gives feedback, and hosts a weekly study hall and VR workshops.

LIVE (SYNCHRONOUS) LEARNING

In the Live section you join scheduled class meetings on Optima's VR campus, where your teacher leads instruction in real time and you learn alongside classmates. The lessons, practice, and summatives are the same as the On-Demand course; what differs is the pacing — a Live section moves through the material together on the class schedule rather than at each scholar's own pace, and class time is also used for discussion, questions, and guided practice.

Attendance is measured by presence and participation. You are expected to attend the scheduled live sessions, on time and ready to take part. If you must miss a class, notify the school in advance; your teacher will let you know how to make up the work and any material you missed. As in every Optima course, completing your work means a sincere attempt — real effort on real work — and assignments still open and close with each quarter.

> **You meet regularly with a teacher.** The class gathers throughout the week in VR and on Microsoft Teams for live instruction and discussion.

APPROPRIATE USE OF AI

Optima scholars are preparing for a world shaped by artificial intelligence, and learning to use these tools with good judgment is part of that preparation. You are welcome to use AI tools to support your learning — to explain a concept a different way, check your understanding, or brainstorm — unless a particular assignment says otherwise. What AI may never do is the thinking or the work an assignment asks of you: your solutions, explanations, and reflections must be genuinely your own. Submitting AI-generated work as if it were your own is dishonest and, as noted above, counts as an insincere attempt. When you do use an AI tool on an assignment, say so briefly. Above all, build the underlying skill yourself — the goal is for you to be able to judge whether an AI's answer is any good, which you can only do if you can do the math without it.

LEARNING IN VIRTUAL REALITY

Optima is a virtual-reality school. Alongside your Canvas coursework, you will join immersive sessions on Optima's VR campus, where you meet teachers and fellow scholars, take part in live activities, and explore places and ideas you could not visit in an ordinary classroom. Keep your headset charged and ready for any scheduled VR sessions, and treat the VR campus with the same courtesy and seriousness you would a physical one. If you ever cannot get into VR for a session, tell your facilitator — there is an alternative way to take part so you do not fall behind.

BEING AN OPTIMA SCHOLAR

Optima's mission is an excellent, virtue-centered education, and virtue is at the center of this course as much as any other. Every scholar is expected to practice the seven virtues that shape life at Optima — **courage, courtesy, honesty, perseverance, self-government, service, and responsibility**. In practice that means: do your own honest work; treat everyone you meet in, through, or because of this course with respect, in writing, in discussion, and in VR; engage actively rather than passively; come to office hours to get help, meet other scholars, and get to know your facilitator; and take responsibility for your own pacing and progress. You belong to a house and a community of scholars, not only to a course.

WHAT YOU NEED & STAYING CONNECTED

- ☑ A computer with reliable internet and access to **Canvas**.
- ☑ A **VR headset**, charged and ready for the immersive activities on Optima's VR campus.
- ☑ **Microsoft 365** (Word, Excel) with OneDrive, for the documents and data you create and submit.
- ☑ An **approved calculator** — see the course's Grade 6 Reference Sheet and calculator links on the Start Here page.
- ☑ A notebook or binder, and pens or pencils, for notes and worked problems.

Staying connected. Updates about this course are posted on the course's Canvas page; school-wide updates are posted in your Homeroom Canvas course. Check both regularly. Your facilitator holds office hours and is glad to help with the material, to meet you, or to talk through your plans — come by, or reach out any time by email.

Full-year middle-school course · Optima Academy Online, [school year]. Built from the course content (9 modules) and the board-approved academic calendar. School calendar dates may be adjusted by the school.
