Start Here: Set Your Weights and Syllabus

How this course's gradebook is set up right now, what the syllabus says, and where the syllabus lives.

THE GRADEBOOK AS IT STANDS

This course has two Canvas assignment groups, and **group weighting is switched on**: Homework is weighted at 60% and Projects & Milestones at 30%, matching the syllabus. There are 40 graded items.

Assignment Group	Canvas Group ID	Weight now	What lives here
Homework	617	60%	18 Reading Quizzes (auto-graded) and 18 Primary Source Assessments (rubric-scored, 16 points each).
Projects & Milestones	619	30%	Quarter 3 Capstone (16 points, Week 27), Quarter 3 Exam (30 points, Week 27), Quarter 4 Exam (28 points, Week 36), Year-End Synthesis Essay (16 points, Week 36).

The Module Intro and Module Outro surveys in each week are ungraded and do not appear in the gradebook.

WHAT THE SYLLABUS SAYS

The syllabus states 60% asynchronous homework, 30% projects, and 10% synchronous homework and activities. That matches the first semester's syllabus. This On-Demand course has no synchronous work, so the 10% has no group in Canvas:

Syllabus	Canvas today
Homework 60%	Homework group, 60%
Projects 30% (the two quarter exams, the capstone, and the year-end essay)	Projects & Milestones group, 30%
Synchronous homework & activities 10%	No group and no items

One thing to check. The two weighted groups add up to 90, not 100. Canvas calculates grades from the groups that have work in them, so students are graded on Homework and Projects in the 60 to 30 proportion. If you would rather have the weights add to 100, either create a third group for the 10% synchronous share or reweight the two groups (for example 67 and 33), and change the syllabus's grading section to match.

WHEN YOU CHANGE A WEIGHT

Update the syllabus's Assessment & Grading section to match. The master source for the syllabus file is **build_syllabus.py** in this course's build folder (03_Build/front-matter); change the grading text there and regenerate the .docx rather than editing a downloaded copy, if you want the change to survive a rebuild.

Within a group, each item counts in proportion to its points. In Projects & Milestones that means the Quarter 3 Exam (30 points) and the Quarter 4 Exam (28 points) count for more than the Quarter 3 Capstone and the Year-End Synthesis Essay (16 points each). If you want the capstone or the essay to count for more, change its points in Canvas.

SCOPE, AND EVERYTHING ELSE

This build covers Quarters 3 and 4 (Weeks 19–36) only; the first semester is a separate course build. The syllabus's Important Dates table lists the second-semester calendar dates only.

Standing reminder for your own edits, not a defect in what has shipped: the words “Fall” and “Spring” should not label the course or its parts in anything you hand to students. The syllabus is clean of those labels. The one exception is the school calendar's own holiday name, “Spring break.”

This Teacher's Module also holds the Teacher's Manual, the Standards Alignment Matrix, the Course Map, and the editable syllabus file. Only the On-Demand syllabus has been built; there is no Live-section syllabus for this semester.
