Teacher Manual

M/J VISUAL ART 2 · FLORIDA COURSE 0101110 · OPTIMA ACADEMY ONLINE

Facilitator copy. Contains answer keys and grading guidance. Do not publish to students. This manual is a standalone document for the teacher of record. It is never linked into the student-facing Canvas course. Where a fact could not be verified directly against the built course, it is marked **[VERIFY]** rather than assumed.

Contents

1. How this course works: typical lesson, typical week, major assessments
2. Ungraded interactives & the intro/outro wrappers
3. AI & VR in this course (student-facing)
4. Using Ignite AI to support students (teacher-facing)
5. Grading categories & Canvas gradebook setup
6. Rubrics for every teacher-graded item
7. Discussions, quizzes & interactive activities — how to run & grade
8. Coach, not catch
9. Weekly announcement scripts
10. Teacher workflow & workload map
11. Standards coverage map (CPALMS → modules)
12. What makes this course classical & cultivating culture
13. Sensitive-content flags & family/student scripts
14. Adapting to a live, 4-day-per-week section (weekly guide)

Read this first — standards mismatch. A full benchmark audit (Section 11) found that the NGSSS codes cited inside every module's `00_Teacher_Cycle-Plan.md` do not match the official CPALMS benchmark list for course #0101110. The cited codes appear to belong to a different Visual Art course. Only 5 of the 15 required benchmarks are covered by coincidental overlap; 10 are not correctly tagged anywhere in the build, including the safety-protocol benchmark (VA.68.S.3.3). This does not necessarily mean the content itself fails to teach the required skills — several required benchmarks likely are taught, just under the wrong code — but every cycle plan should be re-tagged against the correct 15-code list before this course is treated as standards-complete. See Section 11 for the full comparison.

1. How This Course Works

A typical lesson

Every module opens with a GitHub-deployed **Instructional Page** (file `01`): a hook question, an "I Will Be Able To" objectives box, a real embedded artwork image with description, one or two click-to-check interactive widgets (multiple-choice with feedback, or a flip-card), and a closing key idea callout. This page is **ungraded** and produces no submission — it is formation-by-practice. From there, the student moves to the graded touchpoints: a Week 1 sketch, a Week 1 quiz, a Week 2 studio artwork with artist statement, and a Week 2 discussion.

A typical week

SEGMENT	WHAT THE STUDENT DOES	GRADED?	TIER
Week 1, early	Reads the Instructional Page; completes embedded self-check widgets	No	—
Week 1, sketch	Completes a short master-study sketch copying the module's featured artwork	Yes (completion)	Tier 1
Week 1, quiz	Takes a 7-question auto-graded quiz (Elements/Principles or Art History type)	Yes (auto)	Tier 1
Week 2, artwork	Produces an original studio artwork applying the module's Elements/Principles, plus a 1–2 sentence artist statement	Yes (rubric)	Tier 3
Week 2, discussion	Posts a claim-and-evidence response to a prompt, then replies to one classmate	Yes (simple rubric)	Tier 2
Module open / close	Completes the intro survey (essential question, objectives acknowledgment, confidence baseline) and the outro survey (revisit, confidence, unclear, virtue reflection, engagement)	Completion credit	Tier 4

Every module runs this identical rhythm across all 17 modules, so once a facilitator learns Module 1's pattern, every later module reuses it with a new artwork, technique, and movement.

Major assessments — full course table

#	MODULE	QUARTER	STUDIO PROJECT (TIER 3, 100 PTS)	DISCUSSION (TIER 2, 20 PTS)
1	Elements of Art Review	Q1	Elements of Art Drawing	Reading the Sky
2	Medieval Art (Illuminated Manuscripts)	Q1	Illuminated Manuscript Letter	Pattern or Symbol: Which Makes the Page Speak?
3	Italian Renaissance (City Drawing)	Q1	City Drawing in One-Point Perspective	One Point, Thirteen Figures
4	Form and Space (Impossible Form Stack)	Q1	Impossible Form Stack	What Sells the Illusion?
5	Baroque (Value Pumpkins)	Q2	Value Pumpkins	Chasing the Light
6	Landscape (Hundertwasser)	Q2	Hundertwasser-Inspired Landscape	Rule-Breaker or Genius? The Case of the HundertwasserHaus
7	Realism (Still Life)	Q2	Still Life	One Tool, Doing the Most Work
8	Pop Art Thiebaud (Cupcakes)	Q2	Cupcakes with a Textured Background	Texture or Repetition: What Sells the Frosting?
9	Digital Art and AI (Art Through Time)	Q3	Art Through Time: Transforming Images	Change One Thing

10	Impressionism (Monet)	Q3	Landscape Inspired by Monet	Same Haystacks, Different Light
11	Post-Impressionism (Van Gogh)	Q3	Van Gogh-Inspired Expressive Landscape	Real Sky or Real Feeling?
12	Pop Art Lichtenstein (Digital Pop Art)	Q3	Digital Pop Art	Whaam! or M-Maybe: Which Painting Wins the Pop Art Test?
13	Color Theory (Color Wheel)	Q4	Color Wheel Eye	Order Out of Three Colors
14	Surrealism (Magritte)	Q4	Surrealism Self-Portrait	The Magritte Recipe: Which Work Makes the Ordinary Strangest?
15	Fauvism (Matisse)	Q4	Foil Embossing	Mistake or Choice?
16	Expressionism (Munch)	Q4	The Scream Remix	Which Tool Carries The Scream?
17	Sculpture and Exhibit Design (capstone)	Q4	3D Mini Gallery: Your Year in Review	Curator's Choice: Presenting Your Mini Gallery

Grading time estimate: ~5 min/student for the Tier 3 rubric item, ~1–2 min/student for the Tier 2 discussion (batch-read), roughly 0 min for the auto-graded quiz and completion-scored sketch. Module 17 (the capstone) runs longer per student because it reviews a full-year portfolio rather than one artwork.

2. Ungraded Interactives & the Intro/Outro Wrappers

Ungraded interactive activities (the click-to-check widgets and flip-cards on each Instructional Page) live on GitHub-deployed lesson pages, give the student immediate feedback, and cost the teacher **nothing** to grade — no submission is produced. Treat these as formation-by-practice. A student who skips one shows up indirectly, through weaker quiz or artwork performance, not as a missing grade.

Intro/outro wrappers are Canvas Quizzes in survey mode, not wiki pages. This is deliberate: it turns the essential-question answers, objective acknowledgments, and confidence ratings into **sortable cohort data** a facilitator can triage in aggregate, rather than 500 individual free-text pages to read one by one.

- **Intro wrapper** (per module): essential question (first pass, ungraded), an acknowledgment checklist of the module's "I will be able to" objectives, and an optional 1–5 confidence Likert.
- **Outro wrapper** (per module): essential question revisited, a confidence Likert (early-warning signal), "what still feels unclear," a virtue-reflection prompt tied to that module's practiced virtue, and an engagement question about which artwork or idea the student wants more time with.

> **Highest-leverage move:** spend 15–20 minutes per module triaging outro responses. Look for confidence-Likert clusters below 3, and repeated "still unclear" answers naming the same technique (e.g., several students naming "value" as unclear after Module 4 or 5). Respond with a targeted announcement, a short Ignite-AI-drafted practice variant, or an individual message — not a re-teach of the whole module.

3. AI & VR in This Course (Student-Facing)

AI

This course does not carry a course-wide AI-awareness callout the way some Optima courses do. AI appears as a **topic** only in **Module 9, "Digital Art and AI (Art Through Time)"**, where students use a digital tool to reinterpret a historical artwork and reflect on technology's role in the visual arts. No other module's Instructional Page, sketch assignment, or artwork assignment currently contains an AI-awareness callout box.

> **[VERIFY / gap]** If Optima's house standard is a factual AI-awareness callout in every course (per house style: state what AI can/can't do, never require a specific tool), this course is currently missing that outside Module 9. Flag for the build team before publishing if course-wide AI-awareness coverage is expected.

VR

This course currently has **no weekly VR component**. A course-wide teacher revision on 2026-07-14 removed the VR Session that had been part of each module, pending finalization of Optima's VR platform. Do not tell students to expect a weekly VR activity in this course; if VR is reintroduced once the platform is finalized, this section of the manual will need to be rewritten to describe it (platform-agnostic, by what the student does).

4. Using Ignite AI to Support Students (Teacher-Facing)

> **[VERIFY before finalizing]** Ignite AI's exact feature set varies by Canvas release and by what Optima has enabled. Confirm the current feature set against Optima's live Canvas instance before promising a specific button exists.

With 17 modules repeating an identical rhythm, Ignite AI's highest-value use here is **speed on the repeating touchpoints**, not novelty:

- **Drafting individualized feedback** on Tier 3 artwork/statement submissions, which you then edit and own — the rubric criteria stay the same every module, so a feedback template is easy to personalize fast.
- **Summarizing each module's discussion thread** before you post model comments, so you can find the two or three strongest claims quickly across a large cohort.
- **Surfacing at-risk students** from outro-wrapper confidence clusters or missed Tier 1 sketches/quizzes, and drafting a warm check-in message.
- **Generating a practice variant** of a Tier 1 sketch for a student who needs another rep on a technique (e.g., a second value-scale warm-up before Module 5's Baroque project).
- **Drafting family-facing updates**, especially ahead of the Module 5 Baroque religious-imagery unit (see Section 13).

Standing rule: AI drafts, the teacher decides. Every AI-assisted message is read, edited, and owned by the teacher before it reaches a student or family. AI is never used to surveil, rank, or auto-penalize.

5. Grading Categories & Canvas Gradebook Setup

Assignment groups (suggested weights)

GROUP	CONTAINS	SUGGESTED WEIGHT	METHOD
Major Studio Projects	Week 2 Artwork + Artist Statement, each module	~55%	Rubric (100 pts each)
Studio Practice	Week 1 Sketch / Master Study, each module	~15%	Completion (10 pts each)
Discussions	Week 2 Discussion, each module	~15%	Simple rubric (20 pts each)
Quizzes	Week 1 Quiz, each module	~15%	Auto-graded
Wrappers & Participation	Intro/outro survey wrappers	Completion, not weighted (or 0% weight, "does not count toward final grade")	Completion / survey

> **[VERIFY]** These weights are proposed from the actual point ratios in the build (100 : 10 : 20 : quiz-auto per module) — confirm against the school's official weighted-grading policy before entering them in Canvas, since no separate weighting document was found in this course's build folder.

Step-by-step Canvas setup

1. Settings > Feature Options / Grades > Assignment Groups: create the five groups above.
2. Turn on "Weight final grade based on assignment groups" and enter the weights.
3. For each module's intro/outro wrapper quiz: set **Quiz Type = Graded Survey** or **Ungraded Survey** (survey mode), not a regular graded quiz.
4. For the Week 1 Quiz: set correct answers so Canvas auto-grades; confirm the answer key matches each module's `00_Teacher_Cycle-Plan.md` "Quiz answer key" line before publishing.
5. For the Week 1 Sketch: set as a Canvas Assignment, completion-based (full credit for a sincere, on-time submission), 10 pts.
6. Late/missing policy: apply the school's On-Demand policy (zero at quarter close; 10% deduction in the final 14 days of a quarter) per the course syllabus.
7. Use the **Module Requirements** view to see completion of ungraded interactives at a glance — this is your signal for who is engaging with the Instructional Page itself, separate from the gradebook.

6. Rubrics for Every Teacher-Graded Item

Standard Week 2 Studio Artwork rubric (100 pts, 5 criteria × 20 pts)

Every module's Tier 3 artwork rubric follows the same five-criterion shape, confirmed directly in the build (Module 1 and Module 8 both use this structure). The first two criteria are **technique-specific to that module's featured concept** (e.g., Module 8 uses "Value & Shadow" and "Texture & Background"; Module 3 would instead weight perspective/line criteria; Module 2 would weight pattern/symbol criteria). The last three criteria repeat every module:

CRITERION	PTS	WHAT IT GRADES
Technique Criterion 1 module-specific	20	The module's primary featured skill (e.g., value, perspective, pattern)
Technique Criterion 2 module-specific	20	The module's secondary featured skill (e.g., texture, proportion, symbol)
Unity & Proportion / Composition	20	Whether the piece holds together as one composition, believable proportion
Artist Statement	20	Specific, personal, uses accurate art vocabulary (not vague/general)
Craft, Completion & Signature	20	Neat, fully finished, signed

> **[VERIFY]** The two module-specific criteria for Modules 2–7 and 9–17 were not individually re-read for this manual; pull the exact criterion names from each module's `05_Week2_Artwork-ArtistStatement.html` rubric table before grading, in case a module varies from the 5-criterion × 20-pt shape.

Free-response quiz items

The Week 1 Quiz in every module is built to be **100% auto-gradable** (multiple choice, true/false, matching) by design — the build notes explicitly route any reflective or short-answer work into the Week 2 artist statement instead. There are no free-response quiz items in this course requiring a teacher answer guide.

Discussion rubric (simple, reused every module)

LEVEL	LOOKS LIKE
Full credit (20 pts)	Names a specific claim, points to a specific visual detail as evidence (not a general impression), and a reply that engages the classmate's evidence with added reasoning
Partial credit	Claim present but vague/unsupported, or a thin reply ("I agree")
Zero	Missing

Paste each rubric into its Canvas item as a native Canvas Rubric so it scores directly in SpeedGrader.

7. Discussions, Quizzes & Interactive Activities — How to Run & Grade

General guidance by type

- **Auto-graded quiz (Tier 1):** Canvas self-grades on save. Spot-check the answer key against the module's Teacher Cycle Plan once per module, since answer positions are intentionally varied (not always A/B/C/D in order).
- **Structured discussion (Tier 2):** Read in one batch near the end of Week 2. Drop 2–3 public comments modeling a strong, specific claim before scoring the rest. Budget ~1–2 minutes/student.
- **Reflection/wrapper survey (Tier 4):** Not graded for content. Skim in aggregate (see Section 2) rather than reading every response individually.
- **Studio project + artist statement (Tier 3):** Grade with the 5-criterion rubric (Section 6). Budget ~5 minutes/student.

Per-instance grading notes (representative modules)

MODULE	DISCUSSION	FULL-CREDIT SHAPE
1	Reading the Sky	Names movement or contrast as the stronger Principle in *The Starry Night*, points to a specific brushstroke/color/shape as evidence, replies to a classmate who named the other Principle with a specific counter-detail.
8	Texture or Repetition: What Sells the Frosting?	Takes a position on which device does more work in Thiebaud's painting, cites a specific visual detail, replies with engagement to a classmate's opposing claim.
17	Curator's Choice: Presenting Your Mini Gallery	Explains one curatorial choice made in arranging the year-end mini gallery, replies to a classmate's choice with a specific comparison.

[VERIFY] Modules 2–7 and 9–16 follow the identical claim-and-evidence discussion format (confirmed by title and by the Module 1/8/17 instances read directly); pull each module's exact prompt from its own `06_Week2_Discussion.md` before grading, since specific evidence requirements vary by artwork.

8. Coach, Not Catch

- Feedback names the next step, not just the error. Lead with what is working in the artwork before naming what to adjust.
- Allow re-attempts on the Week 1 sketch; it is a practice rep, not a one-shot trap.
- Use outro-wrapper analytics and Ignite AI to **find students who need help early**, then reach out — not to build a case against them.
- If a submission looks AI-generated rather than hand-made (a suspiciously polished digital artwork with no process shown, for a module that expects a physical sketch), open a conversation and ask the student to walk through their process. Treat it as formation, not an accusation.
- Public discussion comments model good thinking; they never single out a weak post for public criticism.

9. Weekly Announcement Scripts

Reusable template

> "Welcome to Module [N]: [Module Title]. This module we're looking at [featured artwork/artist]. This week, [the one thing not to miss — e.g., the Week 2 artwork is due Friday]. If you're stuck on [common tricky concept], try [specific tip]. [One warm line of encouragement]."

Situational scripts

- **Mid-module check-in:** "If your confidence on the last outro survey was a 1 or 2, that's completely normal at this point — come to office hours this week and we'll work through [technique] together before the Week 2 artwork is due."
- **Pre-major-assessment reminder:** "Reminder: this week's Week 2 Artwork + Artist Statement is due [date]. Full credit needs all five rubric pieces — check the success-criteria checklist on the assignment page before you submit."
- **Re-engagement nudge:** "I noticed you haven't submitted [item] yet — no penalty for pacing within the quarter, just want to make sure you have what you need. Reply here or come to office hours."

Clone the template for each of the 17 modules, naming that module's real featured artwork and due dates from your Canvas calendar.

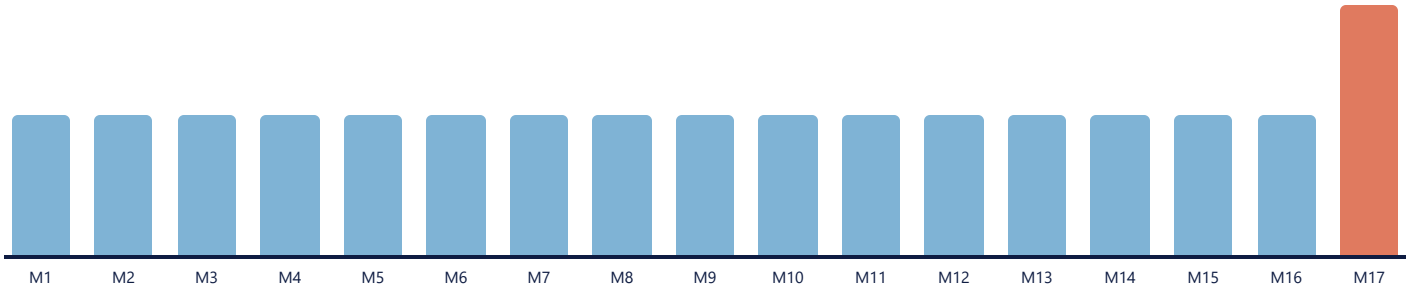

10. Teacher Workflow & Workload Map

A normal module's workflow, in order

1. Triage the previous module's outro-wrapper analytics (15–20 min).
2. Batch-grade the Week 2 discussion once replies close (~1–2 min/student).
3. Grade the Week 2 Artwork + Artist Statement with the rubric (~5 min/student).
4. Post the module announcement.
5. Answer messages / hold office hours through the module.

Relative workload by module

Because all 17 modules run the identical assessment rhythm (one 100-pt rubric item, one 20-pt discussion, one auto-graded quiz, one completion sketch), teacher load is unusually **flat across the year** compared to courses with occasional big projects. The one exception is **Module 17**, the sculpture/exhibit-design capstone, which reviews a curated year-long portfolio rather than a single artwork and runs longer per student.

Relative facilitator-grading load by module. Blue = steady studio-cycle load (one rubric item, one discussion, per module). Coral = heavier (Module 17's year-end portfolio review). Plan extra time on Module 17.

11. Standards Coverage Map (CPALMS → Modules)

Action item before publishing. The 15 official CPALMS benchmarks for course #0101110 are listed below alongside what the audit found in the build. The codes actually cited in every module's `00_Teacher_Cycle-Plan.md` belong to a different benchmark pool (repeating in four blocks across modules 1–4, 5–8, 9–12, and 13–17) and do not match this official list, except for the five rows marked "Yes (by overlap)" below. Re-tag every cycle plan against the correct codes before treating this course as standards-complete.

CODE	BENCHMARK	CURRENTLY CORRECTLY TAGGED IN BUILD?
VA.68.C.1.3	Identify qualities of exemplary artworks transferable to judging personal work.	Yes (by overlap, Modules 13–17 block)
VA.68.C.3.2	Compare qualities of artworks and utilitarian objects for aesthetic significance.	**No** — build cites C.3.1 instead (Modules 5–8)
VA.68.F.1.1	Use non-traditional thinking/techniques to create 2D/3D/4D artworks.	**No** — build cites F.1.2 instead (Modules 9–12)
VA.68.F.2.5	Create an artist statement reflecting on personal artwork for portfolio/exhibition.	**No** — build cites F.2.1 instead, though every module's artist statement plausibly satisfies F.2.5's intent
VA.68.H.3.2	Discuss background knowledge/critical thinking to understand concepts, viewpoints, solutions.	**No** — build cites the related-but-distinct H.3.3
VA.68.H.3.3	Create imaginative works including background knowledge from other subjects.	Yes (by overlap, Modules 9–12 block)
VA.68.O.1.3	Combine creative and technical knowledge for visually strong artworks.	**No** — build cites O.1.1/O.1.2 instead
VA.68.O.2.1	Create new meaning through shared language, expressive content, ideation.	**No** — build cites O.2.2 instead (Modules 5–8)
VA.68.O.2.4	Select media/techniques to communicate personal symbols via structural elements.	**No** — not cited anywhere
VA.68.S.1.4	Use accurate art vocabulary to explain creative/art-making processes.	Yes (by overlap, Modules 5–8 block)
VA.68.S.2.2	Create artwork requiring sequentially ordered procedures/specified media.	Yes (by overlap, Modules 13–17 block)
VA.68.S.2.3	Use visual-thinking/problem-solving in a sketchbook/journal.	**No** — not cited anywhere, despite Week 1 sketches plausibly fitting
VA.68.S.3.1	Use 2D/3D materials and tools, understanding potential and limitations.	Yes (by overlap, Modules 13–17 block)
VA.68.S.3.3	**Demonstrate understanding of safety protocols for media/tools/processes.**	**No** — build cites the likely-miscoded S.3.4 instead. Safety is compliance-relevant for a hands-on studio course; verify it is taught and correctly tagged.
VA.68.S.3.5	Apply 2D techniques/media to enhance 3D artwork.	**No** — not cited anywhere; Module 17 (sculpture/exhibit) is the most plausible fit and should carry this code.

Cross-curricular MA.K12.MTR / ELA.K12.EE / ELD.K12.ELL.SI codes listed on the CPALMS course page are generic Florida B.E.S.T. expectations embedded across all courses; they were out of scope for this module-level audit.

12. What Makes This Course Classical & Cultivating Culture

What makes it classical

- **Look-long-before-making:** every module's Week 1 sketch is a master-study copy of a real, named artwork before the student attempts an original composition in Week 2 — the atelier study/copy-then-originate rung, done in miniature every two weeks.
- **The Great Conversation in visual form:** the year moves chronologically through real art-historical movements (medieval illumination, Renaissance, Baroque, Realism, Impressionism, Post-Impressionism, Pop Art, Surrealism, Fauvism, Expressionism), so students encounter primary visual sources directly rather than a textbook survey of "styles."
- **The virtue thread:** the outro wrapper's virtue-reflection question ties each module's practiced virtue to a concrete moment in that module's studio work, surfaced through reflection rather than a moralizing add-on.

Cultivating culture asynchronously

- Drop 2–3 public model comments per discussion naming specific, sharp observations (not just "good job") to model the kind of looking the course is teaching.
- Reference student artwork by name in weekly announcements ("Several of you found clever ways to break the value rule on purpose in the Impossible Form Stack — nice work").
- Hold the year-long portfolio visible: remind students in Q3–Q4 announcements that Module 17's mini gallery will look back across everything they have made.

13. Sensitive-Content Flags & Family/Student Scripts

MODULE	WHAT	WHY IT MAY WARRANT ADVANCE NOTICE
5 — Baroque (Value Pumpkins)	Featured artworks include Caravaggio's *The Calling of Saint Matthew*, *Saint John the Baptist*, and a Flemish *The Taking of Christ*	Biblical/religious subject matter and a scene of arrest/betrayal (Taking of Christ); neutral historical-art framing, but families may want advance notice given the religious content.
16 — Expressionism (Munch)	Featured artwork is Munch's *The Scream*, an image built around anxiety/existential dread	Mild; the artwork is widely reproduced and already used in Module 1, but Module 16 returns to it as the primary subject for an original response piece.

> **Suggested family/student script (Module 5):** "In [Module 5], we're studying the Baroque period through Caravaggio's dramatic use of light and shadow. Some of the featured paintings depict Biblical scenes, including one showing an arrest. We're studying these works for their artistic technique — how the artist used light to direct your eye and build drama — not for their religious content specifically. If you have questions about this module, please reach out to [teacher name/email]."

No other module surfaced content warranting an advance-notice script; the course is otherwise a standard studio-art and art-history survey with no violent, graphic, or otherwise mature material identified in the build.

14. Adapting to a Live, 4-Day-Per-Week Section

The course was built async, but every module's two-week, five-touchpoint rhythm (Instructional Page → sketch → quiz → artwork/statement → discussion) maps cleanly onto four live class meetings per week across two weeks (8 meetings/module). The table below gives one adaptation per meeting; a facilitator running a live section can follow it module after module without re-planning from scratch.

WEEK	DAY	LIVE-CLASS ADAPTATION
Week 1	Day 1	Walk the class through the Instructional Page together on a shared screen: read the hook question aloud, do the embedded self-check widgets as a whole-class poll (thumbs up/down or quick show-of-hands) instead of solo clicking, and view the featured artwork projected large enough for the room to study details together.
	Day 2	Studio time: students begin the Week 1 master-study sketch in class instead of at home. Circulate for a live version of the "look for a full minute before you draw" instruction — call time out loud so the whole room looks together, then draws together.
	Day 3	Finish and turn in the sketch at the start of class; spend the rest of the period on the Week 1 Quiz, run live (Canvas quiz on personal devices, or as a paced whole-class review with the same questions read aloud one at a time and discussed after each answer is revealed).
	Day 4	Preview the Week 2 studio project: demo the technique live (e.g., building a value scale on the board) before students start their own artwork, so the "watch it happen" step that's a static image/animation in the async version becomes a live demonstration.
Week 2	Day 1	Studio work time on the Week 2 original artwork, with the teacher circulating for real-time feedback instead of only written rubric comments after submission.
	Day 2	Continue studio work; hold a mid-project mini-critique in small groups or as a whole class, using the rubric's five criteria as the critique lens, before final submission.
	Day 3	Finish and turn in the artwork and artist statement. Run the Week 2 Discussion live and in person: the claim-and-evidence prompt becomes a Socratic discussion or a structured debate (one side per Principle/technique named in the prompt) instead of an asynchronous post-and-reply.
	Day 4	Close the module together: do the outro wrapper as a class (still individually submitted in Canvas, but with a live discussion first of "what's still unclear" so the teacher hears it in real time, not just reads it later), then open the next module's hook question as a preview.

What stays the same: the rubric, the point values, the discussion prompt, and the gradebook categories in Section 5 do not change for a live section — only the delivery of each touchpoint moves from solo/async to synchronous/in-person, per the syllabus's "same content, different pacing" policy for Live sections.

Quick checklist before use

☐ Standards mismatch (Section 11) resolved with build team before this course is treated as standards-complete

☐ AI-awareness gap (Section 3) resolved or accepted as-is

☐ Facilitator name, email, and office hours added to the course syllabus (separate file)

☐ Module-specific rubric criteria (Section 6) verified against each module's actual assignment page

☐ Sensitive-content script (Section 13) sent ahead of Module 5
