Start Here: Set Your Weights and Syllabus

How this course's gradebook is already weighted, and where the syllabus and manual live

📌 THE LIVE WEIGHTS, ALREADY SET AND MATCHING THE SYLLABUS

This course's five Canvas assignment groups are already weighted 20/10/40/0/30 and confirmed by the course lead (Session S0, 2026-08-03). Group weighting is enabled (`apply_assignment_group_weights: true`). The table below is the live state of your gradebook right now, not a proposal.

Assignment Group	Canvas Group ID	Ships At	What Lives Here
Tier 1: Reading Quizzes	452	20%	18 Reading Quizzes. Auto-graded.
Tier 2: Discussions	453	10%	9 module Discussions. Teacher-read.
Tier 3: Deep Feedback	231	40%	18 Critical Questions, 10 Primary Source Exercises, 16 VR Activities, 2 Capstones. Rubric-scored.
Tier 4: Module Check-Ins	454	0%	18 module Intro/Outro Wrappers. Surveys, not graded.
Quarterly Exams	455	30%	2 Quarterly Exams (one per quarter, non-cumulative).

Also outside every weighted group, by design and not an omission: the **Semester Final** (item 9.19, an ungraded practice quiz), prepared for you per this course's grade-band mechanics skill but not part of the weighted 100%.

✅ CONFIRM YOUR SYLLABUS ALREADY MATCHES

Both syllabus variants already state **40% Deep Feedback / 30% Quarterly Exams / 20% Reading Quizzes / 10% Discussions**, verified 2026-08-03 against both rendered pages directly. **There is no mismatch to reconcile.** The weights table is identical between Live and On-Demand; neither section carries a grading category the other lacks.

If you change a group's weight in Canvas, update the syllabus's Assessment & Grading section to match. The master source for both variants is `g1_syllabus.py`'s grading list (around lines 111–116 of `03_Build/g1_syllabus.py`); regenerate both `.docx` files and both HTML previews from there rather than hand-editing a downloaded copy, if you want the change to survive a future rebuild.

💡 IF YOU WANT EXAMS TO COUNT FOR MORE

Quarterly Exams is its own top-level group at 30%, not nested inside Tier 3. Raising a Tier 3 item's own point value only redistributes weight *within* Tier 3's 40%, alongside the other 45 items there; it does not touch the Quarterly Exams group's 30%. If you want exams to count for more of the semester grade, change the **Quarterly Exams** group's weight directly in Grades → Assignment Groups; no individual exam's points need to change.

📅 SCOPE, AND EVERYTHING ELSE

This build covers **Quarter 1 and Quarter 2 (Weeks 1–18)** only; Quarters 3 and 4 are a future build. The course content, quizzes, exams, and capstones currently live in Canvas stop at the end of Quarter 2, though the syllabus's own Important Dates table runs the full school-year calendar for context.

Standing reminder for your own calendar edits, not a defect in what has already shipped: the words “Fall” and “Spring” must never appear in anything you hand to students. The syllabus itself is already clean of this label; this reminder covers whatever you add to it yourself.

This Teacher's Module also holds the **Teacher's Manual**, which indexes every satisfied benchmark week by week and points to the full standards matrix, plus both syllabus variants as downloadable, editable files. Start there for anything beyond weights and grading.
