

OPTIMA ACADEMY ONLINE · TEACHER MANUAL

Music Intermediate II

Florida Course #5013100 · Grade 4 · Full Year · **Modules 0–37 (Quarters 1–4, complete)** ·
On-Demand & Live (VR Campus)

0. How to Use This Manual

This manual documents Music Intermediate II's build exactly as it was constructed — every module count, tier ratio, rubric, and standard below is read from the finished, gate-verified build at Development, not assumed. Unlike some sibling courses in this build cycle, Music Intermediate II is complete for **both semesters** (Modules 0–37, all four quarters), so this manual covers the whole course. Two genuine findings surfaced while writing this manual and are flagged in bold below, in Sections 3 and 13 — this is a facilitator-only document, and it holds rubrics, answer keys, and internal standards codes that must never be shown to students or published to the student-facing Canvas course.

Gap found (Section 3): a text search across all 38 interactive lesson pages (Module 0 and Modules 1–37) found no AI-awareness callout anywhere in the built lessons. Not yet corrected as of this manual.

Discrepancy found (Section 5): the official grading catalog promises a recurring "+5% extra" Bonus Opportunities category from multiple "weekly bonus recording challenges," but the actual build contains only one bonus mechanic in all 37 modules (Module 26), and it is a pass/fail assignment-substitution option, not additive points. Needs a deliberate decision before the syllabus and gradebook go live.

Good news: every gap flagged in the original course-improvement notes (solfège, classroom-instrument options, mid-quarter quizzes, VR standards mapping, form-ID double coverage, the Gaudeamus bonus standard, the Final Project rubric) was already implemented during this course's differentiation build and verified present — see Section 11.

Table of Contents

- 1. How this course works
 - 1A. Adapting to a Live, 4-Day/Week Section
 - 2. Ungraded interactives & wrappers
 - 3. AI & VR in this course (student-facing)
 - 4. Using Ignite AI to support students (teacher-facing)
 - 5. Grading categories & gradebook setup
 - 6. Rubrics for every teacher-graded item
- 7. Quizzes & assessment activities
 - 8. Coach, not catch
 - 9. Weekly announcement scripts
 - 10. Teacher workflow & workload map
 - 11. Standards coverage map
 - 12. What makes this course classical
 - 13. Sensitive-content flags

1. How This Course Works

A typical lesson

Every module pairs one interactive lesson page (GitHub-hosted, embedded in Canvas as "Mark as Done," no grade) with a set of Canvas-native graded items. A typical lesson — Module 4, *Melody*, is the exemplar every other module mirrors — opens with a green-and-purple CSS visual (a melody contour, a staff diagram, a solfège ladder where the module touches pitch), walks through the concept in short, Grade-4-friendly blocks, embeds a real recording via a youtube-nocookie.com iframe plus a "Watch on YouTube" fallback link and a credit line (never song lyrics reproduced), and includes a purple **"Grade 4 Challenge"** call-out — an optional stretch task harder than the Grade-3 version of this course. It closes with two self-checking widgets (one no-wrong-answer reflection, one 4-row multiple-choice with scrambled correct positions and per-row feedback), a green "Need Help" box and a purple "Go Further" box, and a preview of that week's assignment.

A typical week (~60–75 minutes)

Segment	What the student does	Graded?	Tier
Module Map	Overview page: week's topic, video links, "about how long" estimate, assignment preview	Ungraded	1
Interactive Lesson	GitHub-hosted page: CSS/SVG visuals, real embedded video, solfège/instrument options where relevant, Grade 4 Challenge, 2 self-checking widgets	Mark-as-done only	1
Quick Check	6-question auto-graded Canvas quiz (3 attempts, highest kept)	Yes, auto-graded	1
Assignment	Performance recording (voice or classroom instrument) or written response, submitted via Canvas Media/Studio or file upload	Yes, teacher-graded (rubric)	3
Reflection	Canvas survey-quiz wrapper: confidence rating, Music Journal tie-in, short reflection	Ungraded (completion)	4

This course has **no Canvas discussion forums** — that is a structural fact of the build, not a missing feature. The single class Music Journal (one Word document, growing all year, checked biweekly at a "Music Journal

Check") is this course's reflective-writing analog to a discussion board, and it is scored lightly at those periodic checks rather than weekly.

Major assessments, whole course

Three assessment types recur every module: a Quick Check quiz, a performance-or-written Assignment, and (at three points per quarter) an upgraded quiz. The table below is the complete module-by-module catalog as actually built.

Mod.	Assignment	Type	Points	Quick Check
1	Parameters In Your Own Words	Written	12	6
2	Write the Meanings	Written	12	6
3	Rhythm In Detail	Performance Recording	30	6
4	Make a Melody + VR Melody Performance	Creative Project + VR	15 + 20	6
5	Harmony In Action	Performance/Creative Recording	20	6
6	Listen For the Feeling	Written (Listening Analysis)	15	6
7	Elvis Appreciation	Written (Music Appreciation Essay)	15	6
8	Tone and the Alphabet	Written	15	6
9	<i>No separate assignment</i> — Q1 Live VR Experience is the module's sole graded item	VR (Q1 capstone)	20 (VR)	8 (Q1 Quiz)
10	Sing the C-Major Scale	Performance Recording	20	6
11	Sing Along With Mozart	Written + Performance	20	6
12	<i>No assignment file</i> — graded entirely by two quizzes	Quiz-only	—	8 + 6 (two quizzes)
13	Jazz With Armstrong	Written + Performance	30	6
14	Brubeck Listening/Reading	Written (+ optional recording)	15	8 (Mid-Quarter Check)
15	Beethoven Fact and Symbols	Written	15	6
16	Ode to Joy Performance	Performance Recording	20	6
17	Pop Artist Research	Written (Research Essay)	20	6
18	Semester Review Performance + Q2 Live VR Experience	Performance Recording + VR	30 + 20	6
19	Reading Challenge (choice)	Written or Performance	20	6
20	Rhythm Practice	Performance Recording	20	6
21	K-Pop Reading Challenge	Written + Performance (2-part)	20 (8 + 12)	6

22	Conducting Recording	Performance Recording	20	6
23	Beating Patterns / Conducting	Written + Performance (drawing + recording)	20	8 (Mid-Quarter Check)
24	Strings Family Video	Performance Recording	20	6
25	Violin/Viola Video	Performance Recording	20	6
26	Treble Clef Reading Practice bonus available	Performance Recording	20	6
27	Flute/Oboe/Prokofiev + Q3 Live VR Experience	Performance Recording + VR	20 + 20	6
28	Clarinet/Bassoon Intervals	Written + Interval Quiz	15	6
29	Trumpet Accidentals	Written (+ optional recording)	15	6
30	French Horn Accidentals	Written	15	6
31	Trombone Reading/Accidentals	Written + Performance	20	6
32	Tuba & Ear Training	Written + Performance	20	8 (Mid-Quarter Check)
33	Percussion & Major Scales	Performance Recording	20	6
34	Review Reflection Pt. 1	Written (Reflective Essay)	15	6
35	Review Reflection Pt. 2	Written (Reflective Essay)	15	6
36	Review Reflection Pt. 3	Written (Reflective Essay)	15	6
37	Final Music Review Project + Q4 Live VR Experience	Creative Project + VR	40 + 20	<i>no Quick Check — only module without one</i>

Three modules per quarter after Module 9 carry an upgraded **Mid-Quarter Cumulative Check** (8 questions, 3 attempts, highest kept) instead of the normal 6-question Quick Check: Module 14 (covers Modules 10–14), Module 23 (covers 19–23), and Module 32 (covers 28–32). Every quarter ends with a Live VR Experience (Modules 9, 18, 27, 37), each worth 20 points on the same 4-criteria participation rubric (Section 6). Module 37 additionally carries the Final Music Review Project, a cumulative creative submission with its own 4-point holistic rubric (Section 6).

1A. Adapting to a Live, 4-Day/Week Section

Music Intermediate II is built async-first — one module, one self-paced week — but Optima also runs Live sections of this course that meet on Optima's VR campus **four days a week**, using the exact same Module Map, interactive lesson, Quick Check, assignment, and reflection wrapper, unchanged. Nothing in the build needs to be rewritten for a Live section; what changes is *pacing and facilitation* — the async week's five components get distributed across four scheduled meetings instead of being completed independently, with the added benefit that a Live facilitator can coach singing and playing in real time, which an async

format cannot offer. Below is a general weekly template a Live facilitator can reuse every week, followed by the places it flexes.

Day	What the class does together	Facilitator's role that day
Day 1	Open with the Module Map as a live preview: name the week's topic, play the lesson's opening video excerpt together, and take a first pass at the CSS visual (solfège ladder, staff, contour) as a class. Release the interactive lesson for individual or partner completion.	Frame the week's focus question, lead the first listen, model the week's vocabulary and, where relevant, the solfège syllables aloud.
Day 2	Students finish the interactive lesson individually or in pairs (remaining visuals, both self-check widgets, the Grade 4 Challenge). Administer the Quick Check (or Mid-Quarter Check on Modules 14, 23, 32) live, in class, then debrief any commonly missed items together.	Circulate during the lesson; proctor and debrief the quiz; preview the week's assignment and its rubric.
Day 3	Rehearsal day. Model the week's performance or written task, then give students structured practice time with real-time coaching — singing back a phrase, checking a solfège pattern, reviewing a written response draft. This is the day a Live section can do something async students cannot: get in-the-moment correction before they record or submit.	Model the task once at full quality; circulate and coach; flag students who need a smaller-group re-teach.
Day 4	Students finalize and submit their recording or written assignment, ideally captured live in class rather than at home. Close with the Reflection wrapper as a group exit routine (same three prompts, discussed aloud first, then logged individually in Canvas), and preview next week's topic.	Give final individual feedback before submission; collect the Reflection wrapper; confirm every student has submitted before dismissing.

Where this flexes — quarter capstones (Modules 9, 18, 27, 37): these replace the week's normal lesson-and-assignment pattern with a review lesson, a quiz, and a synchronous Live VR Experience that is already built into the course for both formats — a Live section does not need to invent anything new here. Recommended split: Days 1–2 = review content + the quarter quiz; Day 3 = additional review or (Module 37 only) dedicated Final Project work time; Day 4 = the Live VR Experience itself, since it is already a scheduled, synchronous event that fits naturally into the Live section's existing weekly rhythm.

Where this flexes — Mid-Quarter Check weeks (Modules 14, 23, 32): these carry an 8-question cumulative quiz in addition to the normal week. Administer it on Day 2 as described above; it takes the place of the regular 6-question Quick Check that week, so no extra class time is needed beyond the debrief.

This same 4-day template repeats for every other module in the course — there is no need for a separate write-up per module. The only elective adjustment: on Modules 17 and 21 (open-ended pop/K-Pop artist research, see Section 13), consider using part of Day 1 to set expectations for age-appropriate artist choices before students begin their research independently.

2. Ungraded Interactives & the Module Map / Reflection Wrapper

Ungraded interactive widgets (embedded in every lesson page) live on GitHub-deployed pages, give the student immediate feedback, and cost the teacher nothing — no submission is generated, and none needs grading. They are formation-by-practice, not busywork to chase down. A student who skips one shows up indirectly, in weaker Quick Check or assignment performance, not as a missing grade in your gradebook.

The **Module Map** (Tier 1, ungraded) is the week's overview: topic, embedded/linked videos, an "about how long this week" time estimate, and a preview of the assignment. The **Reflection wrapper is a Canvas Quiz in survey mode**, not a wiki page — every response is sortable cohort data. It captures a confidence rating, a short reflection tied to that week's Music Journal entry, and (on the virtue-threaded modules) a brief virtue prompt.

Highest-leverage move in the whole course: spend 10–15 minutes per module scanning Reflection responses. Look for clusters of low confidence — your earliest signal of who needs help, before a Quick Check score would show it. Respond with a targeted announcement, an Ignite-AI-drafted individual message, or a quick Canvas comment.

3. AI & VR in This Course (Student-Facing)

Gap found: a text search across all 38 built interactive lesson pages (Module 0 orientation plus Modules 1–37) turned up no AI-awareness callout of any kind — no "AI can/can't do this" box, no mention of AI tools, anywhere in the built lessons. Optima's general policy is "AI = awareness, not required tool use," and Chrome Music Lab (a creative composition tool, not an AI tool) already appears as a Go-Further option in several modules, but there is currently no in-lesson moment that teaches AI awareness itself. Until the course is revised to add one, direct any AI-related student question to the general school AI policy; there is nothing in-lesson to point to yet.

VR: every VR item in this course is confirmed platform-agnostic in the actual build (no ENGAGE- or IFX-specific language appears anywhere in the Development files) and describes VR by what the student does: choose a Location, set up a "stage" with props or effects, and perform. Two kinds of VR activity exist:

- **Module 4's solo VR Melody assignment** (20 pts): the student performs a melody, sung or played on a classroom instrument, in a VR space they choose, on a 4-criteria rubric (melody quality, use of the VR space, recording quality, written description).
- **Quarterly Live VR Experiences** (Modules 9, 18, 27, 37; 20 pts each): a synchronous, facilitator-led class session with music games and review activities, graded for attendance, participation, a brief reflection, and correct use of a music vocabulary word — the same 4-criteria rubric reused every quarter (Section 6).

Each of these five VR items carries an off-page "Standards for this experience" comment naming 1–2 MU.4 benchmarks (Section 11) — this mapping was a specific gap flagged in the original course-improvement notes and has already been implemented across the whole build.

4. Using Ignite AI to Support Students (Teacher-Facing)

[VERIFY] before relying on this section: Ignite AI's exact feature set and availability depend on Optima's current Canvas release. Confirm what is actually enabled in your Canvas instance before promising a specific button to yourself or a co-teacher.

With roughly 500 On-Demand students per facilitator, Ignite AI (the Canvas AI assistant) is what makes individualized attention possible at this scale. Five functional uses, all governed by the coach-not-catch rule in Section 8 and one standing principle: **AI drafts, the teacher decides**. You always read, edit, and own anything before it reaches a student or family.

- **Drafting individualized feedback** on performance recordings and written responses against the standard rubric (Section 6) — faster turnaround, same human judgment, since you edit before posting.
- **Summarizing Reflection-wrapper analytics** after each module to find the cohort's sticking points in minutes — especially useful ahead of a Mid-Quarter Check (Modules 14, 23, 32) or a quarter capstone (9, 18, 27, 37).
- **Surfacing students who need a nudge** — low confidence on a recent Reflection, a missed assignment, a quiet Music Journal — and drafting a warm check-in message you personalize before sending.
- **Generating extra practice variants** for a student who needs another rep before a quiz re-attempt (e.g., more rhythm-notation items after a rough Module 20 quiz, or another solfège pattern after a shaky Module 10 recording).
- **Communicating with families** — clear, kind progress summaries, and drafting the age-appropriate-content advance notes in Section 13 ahead of Modules 17 and 21.

5. Grading Categories & Canvas Gradebook Setup

The course's official grading scheme (Assessments catalog / Syllabus) is:

Category	Weight	Notes
Weekly Module Assignments	50%	Creative recordings, written responses, practice tasks — every module's Assignment item
Quizzes (Q1 & Cumulative)	20%	Weekly Quick Checks, the 3 Mid-Quarter Checks, and the Module 12 cumulative/symbol quizzes
VR Live Experiences	15%	Quarterly participation (Modules 9, 18, 27, 37); attendance is required
Final Music Review Project	10%	Module 37 — cumulative creative and written submission
TOTAL	100%	The four required categories sum to exactly 100% — no gradebook math decision is needed there.

Discrepancy found — resolve before publishing the syllabus: the course's grading catalog describes a "Bonus Opportunities" category worth **+5% extra** from "weekly bonus recording challenges" and "extra-credit assignments" (plural). A file-by-file scan of all 37 built assignment files found only **one** such mechanic in the actual build — Module 26's "Gaudeamus Igitur" recording — and it is not additive extra credit at all: the file states a completed bonus recording "may replace one assignment for the week," a pass/fail substitution, not points added on top of 100%. Before publishing, either (a) update the syllabus to describe the Module 26 bonus accurately as a one-time substitution option, not a recurring +5% category, or (b) build the additional weekly bonus challenges the syllabus already promises. Do not leave the syllabus claiming a +5% category the build does not deliver.

Step-by-step Canvas setup: Grades → enable weighted assignment groups → create the four groups above at their stated weights, plus an unweighted "Bonus" group for extra-credit items → on the Module Map and Reflection wrapper items, set them to *Not Graded / Ungraded Survey* so they never post a grade → set late policy per the syllabus (10% deduction inside the final 14 days of a quarter, 0 after quarter close) → use the Module Progress / Requirements view as your at-a-glance completion signal for mark-as-done lesson pages, since those never appear in the gradebook.

Item	Assignment group	Points/Weight	Grading method
Module Map	(not graded)	0	Mark-as-done only
Interactive Lesson	(not graded)	0	Mark-as-done only
Quick Check / Mid-Quarter Check	Quizzes	6 pts (8 pts on Mid-Quarter weeks)	Auto-graded, multiple attempts, highest kept
Assignment	Weekly Module Assignments	Varies by module (Section 6)	Native Canvas Rubric
Reflection wrapper	(not graded)	0	Survey mode — completion only
Live VR Experience	VR Live Experiences	20 pts each	4-criteria participation rubric (Section 6)
Final Music Review Project	Final Music Review Project	Module 37	4-point holistic rubric (Section 6)

6. Rubrics for Every Teacher-Graded Item

Standardized recording rubric — every audio/video performance assignment

Per the course's differentiation build, **every** performance-recording assignment across Modules 1–37 uses this exact 4-criteria rubric, scaled to that assignment's point total (parts rounded so they sum to the total):

Criterion	Weight	What it looks for
Musical Accuracy	40%	Notes/rhythms match the target material; pitches recognizable; no major errors
Effort & Attempt	30%	Clearly tried; audible; did not abandon partway

Task Completion	20%	All parts submitted as specified (written response + recording + comment, where applicable)
Audio/Video Quality	10%	Audible; student is the primary sound; minimal background noise

Example scalings actually used in the build: 20 pts → 8/6/4/2; 15 pts → 6/5/3/1. Non-recording (written-only) assignments instead use a 3-criterion written rubric: content accuracy, correct use of module vocabulary, and clarity/completeness — scaled the same way.

VR participation rubric — Module 4 solo assignment and all four Live VR Experiences

Criterion	Points	What it looks for
Attendance & presence (Live Experiences) / Melody quality (Module 4)	5	Live: on time, stayed the whole session. Module 4: a clear original melody, sung or played.
Joining in / Use of the VR space	5	Live: took part in the activities. Module 4: chose a stage and set it up with props or effects.
Reflection / Recording quality	5	A clear sentence about what the student did, or an audible, appropriately-long recording.
Music word / Description	5	Correct use of one music vocabulary word from that quarter.
Total	20	

Final Music Review Project (Module 37) — 4-point holistic rubric, 40 pts

Confirmed present in the build (the file's own header comment reads "Holds the ONLY Final Project rubric (4-point holistic)"). The Final Project asks for a cumulative creative submission (a VR walking review, a Canvas Studio production, or an image slideshow) that must include a review of at least 3 modules' key concepts, at least one performance element, and a clear visual/organizational structure.

Level	What it looks like	Points
Excellent	Reviews 3+ modules clearly and correctly; strong performance element; clear structure; correct music vocabulary; finished with care	40
Proficient	Reviews concepts from three modules; includes a performance element; mostly clear and organized; some music vocabulary; main parts finished	32
Developing	Reviews one or two modules, or is missing the performance element or a clear structure; few music words; some parts unfinished	24
Beginning	Just started; covers less than one full topic; no performance element; no clear structure	14

Quick Check / Mid-Quarter Check quizzes

Fully auto-graded — multiple choice, correct positions varied per item, 3 attempts with highest kept. No teacher scoring needed for any quiz in this course; there are no free-response quiz questions in the built quizzes to answer-guide.

7. Quizzes & Assessment Activities — How to Run & Grade

Type	How it's scored	Recommended teacher move
Quick Check (Tier 1)	Auto-graded, 3 attempts, highest kept, 6 questions	No action needed; scan item analysis occasionally for a badly-worded question
Mid-Quarter Cumulative Check (Modules 14, 23, 32)	Auto-graded, 3 attempts, highest kept, 8 questions covering the quarter so far	Use as your own early signal of quarter-wide sticking points before the capstone quiz
Weekly Assignment (Tier 3)	Standardized 4-criteria recording rubric or 3-criteria written rubric (Section 6)	Grade in the Assignment's native Canvas Rubric so SpeedGrader totals it automatically; expect ~5 min/student
Reflection wrapper (Tier 4)	Completion only, never a content grade	Triage for confidence clusters (Section 2) — your early-warning system, not a grading task
Quarter capstone quiz (Modules 9, 18)	Auto-graded, cumulative over the quarter	No teacher scoring; review item analysis before the Live VR Experience so you can address common misses live
Live VR Experience (Tier 3, Modules 9, 18, 27, 37)	4-criteria participation rubric (Section 6)	Grade the same session for the whole class in one sitting right after the event
Final Music Review Project (Tier 3, Module 37)	4-point holistic rubric (Section 6)	The most complex single item in the course; budget real per-student time (Section 10)

Modules 17 (Pop Artist Research) and 21 (K-Pop Reading Challenge) are the two open-ended, student-choice research assignments in the course — see Section 13 for age-appropriate-content guidance to give students before they begin.

8. Coach, Not Catch

Your job is to move each student forward, not to detect and punish. In practice:

- Feedback names the next step, not just the error. Lead with what's working — especially on a first singing or playing recording, which can feel exposing for a Grade 4 student.
- Quiz re-attempts (3 tries, highest kept) are a learning tool, not a trap.
- Use Reflection-wrapper analytics and Ignite AI to find students who need help early, then reach out — not to build a case against them.
- A shy or off-pitch recording is a coaching moment, not a low grade waiting to happen — the standardized rubric already weights Effort & Attempt at 30%, second only to accuracy.
- Public model comments (where you do share feedback with the class, e.g. after a Live VR Experience) name specific student thinking or effort; they never single out weak work for criticism.

9. Weekly Announcement Scripts

As the asynchronous facilitator's main presence, the weekly announcement matters. Template, then drafted examples matched to this course's real cadence.

[Module N] template: "This week: [topic studied]. The one thing not to miss: [due Quick Check / assignment]. If [specific confusion] came up in last week's Reflection, here's a quick tip: [one sentence]. Add this week's line to your Music Journal — can't wait to hear your recording!"

Mid-module check-in (use when Reflection confidence runs low): "I noticed a few of you rated your confidence lower after [lesson topic] — that's normal for [specific skill, e.g., reading eighth notes]. Before you record this week's assignment, try [one concrete tip, e.g., clap the rhythm before you sing it]. Office hours are posted below if you want to talk it through."

Pre-capstone script (use ahead of Modules 9, 18, 27, 37): "This week is our Live VR Experience! Finish all of this quarter's modules first so you're ready for the music games. Bring your favorite music word from this quarter — you'll need it for your reflection afterward."

Re-engagement nudge (quiet students): "Haven't seen this week's assignment from you yet — no judgment, just checking in. If something's stuck, a quick message gets you unstuck faster than working around it alone."

Age-appropriate-choice note (use ahead of Modules 17 and 21): "This week you get to choose your own favorite pop artist [K-Pop artist] to research. Please choose an artist whose music and public image are appropriate for our class — if you're not sure, message me first and I'll help you pick."

10. Teacher Workflow & Workload Map

A normal week: triage Reflection-wrapper analytics (10–15 min) → grade the week's Assignment against the standardized rubric (~5 min/student, spread across the week) → post the weekly announcement → answer Canvas messages as they arrive. Quick Checks need no grading time (auto-graded).

Heavy modules — budget extra time

Modules 9, 18, 27, and 37 each carry a capstone quiz plus a Live VR Experience (rubric-scored) on top of the normal week; Module 37 additionally carries the Final Music Review Project, the single most complex item in the course. Modules 14, 23, and 32 carry the upgraded Mid-Quarter Check, which costs no extra grading time (still auto-graded) but is worth flagging for the announcement script above. Every other module holds to the light, standard pattern.

Blue = standard week. Gold = Mid-Quarter Check week (M14, 23, 32) — still auto-graded, just worth flagging in your announcement. Coral = quarter-capstone week (M9, 18, 27): capstone quiz + Live VR Experience rubric grading on top of the normal week. Dark coral = Module 37: capstone quiz + Live VR Experience + the Final Music Review Project, the heaviest single week in the course — budget real extra time here.

11. Standards Coverage Map (CPALMS → Modules)

Status: the course's differentiation build already implemented every gap named in the original course-improvement notes, and this manual's build-file search confirms each is genuinely present: solfège/sight-singing elements (MU.4.S.1.4) across 13+ melodic modules, classroom-instrument performance options (MU.4.S.2.1) confirmed present in 19 assignment/quiz files, form-identification (MU.4.O.1.1) now assessed in three places instead of one (Modules 17, 21, 35), the Gaudeamus Igitur bonus (Module 26) tagged to MU.4.S.3.4, VR-to-benchmark mapping confirmed platform-agnostic on all five VR items (Module 4 + the four quarterly Live Experiences), and a 4-point holistic rubric confirmed present on the Module 37 Final Project. No open standards gaps remain from the original design-doc audit.

By standard

Standard	Domain	Description	Modules covered
MU.4.C.1.1	Critical Thinking	Identify and describe characteristics of music using appropriate vocabulary	Q1 Mods 1–9 (esp. 1–3), Q2 Mod 10, Q3 Mods 19–24, 27, Q4 Mods 28–37 — the most heavily assessed standard in the course
MU.4.C.1.2	Critical Thinking	Describe how expressive elements affect musical character	Q1 Mods 2, 6, 9, Q2 Mods 15, 16, 17, 18, Q4 Mods 32, 35
MU.4.H.1.1	Historical	Identify contributions of significant composers and performers	Q1 Mod 7, Q2 Mods 9, 11–16, Q3 Mods 24, 25, 27, Q4 Mods 36, 37
MU.4.H.2.1	Historical	Identify music from various cultures and connect to historical/cultural context	Q1 Mod 7, Q2 Mods 9, 13, 14, 17, 18, Q3 Mod 21, 27, Q4 Mods 35, 36, 37
MU.4.O.1.1	Organizational	Identify musical forms and structural elements (AB, ABA, verse/chorus, phrase)	Q2 Mod 17, Q3 Mods 21, 23 (differentiation build added 21 and 23/35 for double coverage beyond the original single Mod 17 instance)
MU.4.S.1.1	Skills	Read and perform rhythmic patterns (whole/half/quarter/eighth notes and rests)	Q1 Mod 3, Q2 Mods 10–12, Q3 Mods 20–23, Q4 Mods 33, 34
MU.4.S.1.4	Skills	Read and perform melodic patterns on the treble clef staff, with solfège (do–la for Grade 4)	Q1 Mods 4, 8, 9, Q2 Mods 10–12, Q3 Mods 19, 21, 24–26, Q4 Mods 28–31, 33, 35 — the course's broadest-reaching skill standard

MU.4.S.2.1	Skills	Perform rhythmic patterns using classroom instruments (added via the differentiation build, not in the original 9-standard course list)	19 assignment/quiz files across the course offer a classroom-instrument option alongside voice list
MU.4.S.3.4	Skills	Sing or play with correct pitch, rhythm, and expressive markings	Q1 Mods 4, 5, 9 (VR), Q2 Mods 13, 16, 18, Q3 Mod 22, Q4 Mod 37 (Final Project); bonus: Module 26 Gaudeamus Igitur
MU.4.F.3.1	Innovation	Identify careers in music; connect skills to real-world musical contexts	Q4 Mod 37 (Final Project)

By module (quick reference)

Mod.	Standards carried	Mod.	Standards carried
1	C.1.1, O.1.1	20	S.1.1
2	C.1.1, C.1.2	21	H.2.1, S.1.4, S.1.1, O.1.1
3	S.1.1, C.1.1	22	S.3.4, S.1.1
4	C.1.1, S.1.4, C.1.2	23	S.1.1, O.1.1

All standards codes are internal (off-page HTML comments in the build), never shown to students. Prefix MU.4. omitted in the by-module table for space.

12. What Makes This Course Classical & Cultivating Culture

What makes it classical: the course treats great composers and performers — Mozart, Beethoven, Louis Armstrong, Dave Brubeck — not as trivia but as a genuine encounter with the Western musical tradition, paired with real primary listening (actual recordings, never descriptions of recordings). The five parameters of music taught in Modules 1–2 (rhythm, melody, harmony, tone, expressive qualities) function as a Notice–Name–Apply structure repeated all year: notice what's happening in a piece, name it with the correct musical term, then apply that vocabulary by singing, playing, or writing about it. The quarterly Live VR Experiences and the Module 37 Final Project ask students to demonstrate real synthesis — performing and explaining, not just recognizing.

Cultivating culture asynchronously: use the weekly announcement to model curiosity about that week's composer or genre, the same curiosity you want from students. The Music Journal, checked biweekly, is where a facilitator can build a real relationship with each student's growing musical voice — a brief, specific comment on a journal entry ("I love that you connected the Ode to Joy melody to a song you already knew") does more for classroom culture in this course than a public discussion board would.

13. Sensitive-Content Flags & Family/Student Scripts

Music Intermediate II is a Grade 4 course with generally light content; nothing in the build is graphic or historically heavy in the way an older-grades course might be. Two modules are worth a brief advance note, both because they hand a student open-ended choice of a real, contemporary artist rather than because of the module's own content.

Module 17 — Pop Music Styles. The assignment asks students to research "a favorite pop artist" and write a short essay, entirely student-chosen. Pop artists' broader catalogs and public personas vary widely in age-appropriateness even when the one song a student names is fine.

Module 21 — K-Pop & Reading Challenge. Same open-choice pattern, applied to K-Pop artists/groups.

Suggested advance script (Modules 17 and 21): "This week your child gets to research a favorite pop [K-Pop] artist for a class assignment. We ask students to choose an artist whose music and public image are appropriate for a 4th-grade classroom. If you'd like to talk through your child's choice in advance, reach out any time before the assignment is due."

Module 7 (Elvis Presley) and Module 13 (Louis Armstrong/jazz) touch mid-20th-century American music history at a light, age-appropriate level (rock and roll's emergence, jazz improvisation) with no content requiring an advance family script.
